

GOVERNMENT PRINTING OFFICE.

ANNUAL REPORT

OF THE

PUBLIC PRINTER

FOR THE

FISCAL YEAR ENDED JUNE 30, 1895.

◆◆◆◆◆

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1895.

ANNUAL REPORT

OF

THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 17, 1895.

SIR: In compliance with law, I have the honor to submit the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1895.

Very respectfully,

TH. E. BENEDICT,
Public Printer.

Hon. A. E. STEVENSON,

President of the Senate.

To the Senate and House of Representatives:

The annual report of the affairs of this office is presented to Congress at an earlier period than usual, in accordance with the requirements of the public printing and binding act of January 12, 1895. All details called for by said act that it is possible to present in complete and intelligible form are included herein.

The office has experienced no difficulty in carrying out the provisions of the new law. Complaints have been received from some sources because of the curtailment of the usual amount of printing, but I have deemed it my duty to prevent the execution of any printing or binding that it was not the evident purpose of the law to allow.

UNSAFE OFFICE BUILDINGS.

I took the liberty a year ago to make some suggestions to Congress relating to the insecurity of the office buildings, and mentioned also the urgent need for more commodious and healthful accommodations. Since that time I have used every precaution that the most constant anxiety could suggest to relieve the dangerous H-street wing of weight and vibration that might cause a collapse. But owing to the failure of Congress to provide for the erection of a building of sufficient size to

permit complete relief of the floors pronounced dangerous by my predecessors and by engineer officers of the Government, it now becomes my duty to repeat the warning regarding the peril that threatens many faithful employees of the Government. Additional working space was provided by the last Congress, but this has only met the necessities arising from the natural increase of work and the demands of the new printing and binding act. The renting of floors and buildings outside of and distant from the main office has still to be resorted to, at a wasteful expense to the Government, and the dangers attending the occupancy of the H-street wing continue, for the reason that it is impossible to withdraw the force from it under any plan yet authorized by Congress and still carry on the work.

ANNEX BUILDING RECOMMENDED.

Again do I most earnestly urge Congress to provide, at as early a day as possible, for the purchase of land contiguous to the present site, and for the erection upon it of a building of sufficient capacity to permit the removal thereto of all the divisions now occupying the H-street wing. This building should be constructed upon modern printing-office plans, and should represent the ideas of the best-known and ablest representatives of the printing and binding world. An architect should be selected at once to gather these ideas and embody them in a plan for adoption. If this recommendation be carried out, it will permit the demolition of the H-street wing and other buildings, and their reconstruction without interference with the current work of the office. All past attempts at relief have been mere makeshifts; there is no true solution of the difficulty in any other plan that has been suggested, for the reason that no other plan provided space for continuing work while rebuilding was going on. The new building should be equipped to meet all the demands of the public service promptly and economically, and enable the Government at the same time to exhibit to the printing and binding trades of this country the practical workings of the highest achievements in these trades, both in finished product and in methods pursued to secure the most desirable results.

INCREASE IN THE AMOUNT OF PRINTING.

Through the introduction of modern systems the office is now able to meet, though not always promptly, the hurried demands upon it, but it can not, if work increases, successfully meet the requirements of the future without Congressional help in the matter of new space and facilities. The new printing act will create a largely increased demand for Government publications because of the free distribution to the people of a priced catalogue of books which the Government offers for sale, and Congress should provide for the printing of the necessary number of copies of books to meet it.

To illustrate how rapid has been the increase of public printing, it will not be amiss to state that during my former term as Public Printer I had great difficulty in meeting the demands of the service the first fiscal year of that term, the year 1887, a long-session Congressional year, during which period the office used 2,718 tons of book, writing, ledger, plate, and other printing papers, and finished 1,327,292 volumes bound in cloth and leather and 286,491 pamphlets. During the fiscal year 1895, ended June 30 last, a short-session Congressional year, the office used 4,547 tons of the same kinds of paper, and there were finished 1,787,473 volumes in cloth and leather and 1,182,955 pamphlets. Here is shown an increase of 69 per cent in the amount of paper used, an increase of 35 per cent in the number of bound books, and of over 500 per cent in the number of pamphlets. There has been a proportionate increase in blank-book and other work. The output of the past year, however, was considerably lessened because of the failure of paper contractors to fill orders promptly and satisfactorily, and because of the interruption of work in the press room by the Army engineers while repairing and building.

NEW WORKING SPACE.

The additions made to the office during the past year, under the direction of the Joint Committee on Printing, afford better-lighted and more healthful accommodations to some of the divisions. The result fully justifies the moderate expenditure, and is an excellent argument in favor of the further relief demanded in the interest of safety to employees and the more prompt, skillful, and economical execution of the public printing.

The building now being erected, under the direction of the Chief Engineer of the Army, by authority of Congress, upon the stable lot west of the main buildings will probably not be ready for occupancy until the coming summer. There are seven floors in this building, each $27\frac{1}{2}$ by 169 feet in the clear, making 31,836 square feet of floor space in all. This building, when occupied in part by necessary elevators and staircases, will, I fear, be of little value except for storage purposes. It will have no entrance at the street level, and not one of its floors is on the same level with the adjoining floors of the main buildings. Its two lower floors will require constant lighting by artificial means, and its erection has deprived some of the divisions in the main buildings of daylight and limited the means of ventilation.

During the year I have increased the working space in the office as much as circumstances would permit. New rooms for the storage of type and for quick communication between the H-street composing room and the Record composing room have been erected; an inner court in the west wing has been roofed over, making a handsome roller-casting room and additional storage room for paper; a plate vault has been con-

structed beneath the North Capitol street wing with three miles of shelving, affording convenient storage for electrotype plates. These and other changes have increased by 5,490 square feet the amount of working space, in addition to the 14,142 square feet in the rooms erected by the Chief Engineer of the Army.

IMPROVED APPEARANCE OF PUBLICATIONS.

During the past fiscal year and present calendar year many improvements to plant and facilities have been made by me, under direction of the Joint Committee on Printing. Some of the working divisions have been enlarged, and as a result I have been able to thoroughly systematize the office and secure a higher standard of workmanship. Many of the publications now issued are admirable in composition, presswork, proof reading, illustrations, and binding, and are scarcely to be excelled by the product of the best private houses of the country. These desirable results were only rendered possible by unceasing effort and the hearty cooperation of skilled and intelligent employees.

NEW PRINTING AND BINDING MACHINERY.

The pressing needs of the past year rendered imperative the substituting of new machinery for much that was antiquated and worn out. From June 1, 1894, to the date of this report there have been purchased twenty-two improved printing presses, including one Hoe web press for the use of the Congressional Record; one pamphlet-covering machine, one quadruple folding machine with electric feeder, one book-backing machine, three paper and book cutters, four ruling machines, six thread and wire stitchers, four book-sewing machines, seven machines for the electrotyping division, and three for the machine shop. The new printing presses are of double the page capacity of the presses they replaced, and are operated at no increase in cost.

An additional web press for printing the Congressional Record was an absolute necessity. The danger of a breakdown with but a single press available for this important work has long caused much anxiety; and its possible serious result was particularly emphasized during the last days of the Fifty-third Congress, when an accident occurred to the old press which almost prevented the printing of the Record and the proper conclusion of the labors of that Congress. There is also need of an extra press when the Record is unusually large, and the old press, which has been repaired, will be reserved for this purpose and for possible accident.

The pamphlet-covering machine was necessary to meet a largely increased demand for work of that kind.

Two old and slow elevators have been removed, and three fast freight elevators substituted.

All of the new machinery is of the very best and most modern pattern.

PAPER AND PAPER CONTRACTS.

The present year has not been free from the usual inconvenience to the office on account of friction with paper contractors. The last awarding of paper contracts saw the customary display of the questionable methods resorted to by certain bidders to secure contracts—by bidding a lower sum than that for which paper equal to the samples could be manufactured. The natural result was that they endeavored to supply paper of a lower grade than the samples in order to save themselves from financial loss. The contests that resulted over attempts to introduce inferior paper were bitter. I have been firm in the resolve that only the most urgent necessity of the office should serve as an excuse for accepting paper below the grade required by the contract. The paper commission created by the new printing law, consisting of the chief clerk, the foreman of printing, and a representative of the Joint Committee on Printing, have executed their duties most intelligently and conscientiously. Upon their reports I have rejected many thousands of reams of paper which were found to be below the standard. In nine cases appeals were taken to the Secretary of the Interior by the contractors or myself, and in every case the judgment of the paper commission was sustained by the arbitrator. During the year six contracts, covering twenty-three sizes of paper, were annulled, and new contracts for the same made, as required by law, with other parties who had bid at the last paper contract letting. In addition, a considerable amount of paper has been purchased in the open market, under authority of the Secretary of the Interior, that the work of the office might not be seriously interrupted.

I most heartily concur in the views expressed officially by former Public Printers that it is not for the best interests of the Government to award paper contracts on the basis of the lowest bids, unless the bidders are known to be reliable manufacturers or control plants of sufficient capacity to produce promptly the quantity and quality required for use here. The present method of awarding paper contracts has been a constant source of embarrassment to the office and a great obstacle to securing a creditable standard of public printing. The early bookmakers when selecting paper and material for binding purposes endeavored so far as was within their power to make it possible for their books to be preserved for posterity. Their example might well be followed by our Government, particularly with the more important publications. The life of most of the books produced here during recent years will be of short duration, owing to the perishable character of the paper used.

I recommend that Congress so change the statute relating to the method of letting paper contracts that bidders must submit samples of the paper they can furnish, instead of the samples being submitted by the Government to bidders, as under the present law. If this were done,

it is fair to assume that a bidder would only bid on the product of his own mill, or some mill whose product he could control, and thus the Government would have practically a guaranty of the successful bidder's ability to furnish paper equal to the samples he submitted.

It is my duty to here express obligations to those paper contractors who have promptly met every requirement of their contracts.

THE STEAM-POWER, HEATING, AND ELECTRICAL PLANT.

The additions of space above mentioned created an immediate demand for additional heat and more artificial light. With a view of meeting this, an expert examination was made to determine the boiler and electric-lighting capacity of the office plant. The boiler capacity was found to be inadequate, and another boiler could not be added for want of space. Thus, sufficient steam facilities for heating purposes could be secured only through the extension of one of the boilers by the addition of an economizer and by utilizing the exhaust steam, which had theretofore been wasted. To secure these advantages for power and heat, it became necessary to put in operation a second engine and an entirely new heating-coil system so constructed as to have independent boiler connections with each section of the main floors. The single engine on which the office depended for power was found to waste 65 per cent of its load in friction, and the old heating coils, operated under the continuous system, without return pipes, cut-offs, or independent floor connections, were found to be so rotten that they could not be extended over the new floors nor longer bear pressure of steam sufficient to heat the space for which they were originally intended. Accompanying this report will be found interesting details of the system substituted. (See A—Statement of the chief engineer.)

The steam-power and heating plant of the office is now as complete as the present requirements demand, with the exception of boiler capacity, an increase of which will become necessary when the new west building is completed.

The steam boilers, located as they are in the center of the group of buildings, are a serious menace to life and property. I urge that Congress at once provide for the purchase of land adjoining the office, and the erection thereon of a building to which all the boilers may be removed.

The old electric-lighting plant was found to have a capacity of 1,400 16-candlepower lamps, which were inadequate to properly light one-third of the office, the remainder being poorly lighted by gas. To provide light for the new space and the wants of the office generally, it became necessary to enlarge the electrical plant or put in a new one. I determined upon the latter plan, having also in view the advantages of the application of electrical power to machinery, and contracted for a new plant of sufficient capacity for all power and lighting purposes.

The utilization of electricity as a motive power is an important step in connection with the work of the office. Electricity applied to machinery has been found to be not only very economical, but a great advantage and convenience. Its easy adaptation to the varying speeds required by printing machinery, its safety, and the ease with which it may be produced and controlled are all points in its favor. The belt-power system in use here was a continuous one, and when one machine was in operation every belt and pulley was set in motion, with consequent danger of fire from friction. Direct electrical power will permit the independent operation of any machine, either day or night, and will also allow machines to be placed in any part of the building without regard to lines of shafting. Besides these advantages, full protection is secured from any general stopping of machinery, such as frequently occurred under the belt system. The new electric plant will save nearly \$11,000 heretofore annually paid for gas, and the cost of artificial light which may be needed in any buildings hereafter erected will be limited to the cost of wiring and lamps. The efficiency of this plant is so great that I deem it worthy of extended description by the chief electrician. (See B—Statement of the chief electrician.)

LEASED FLOOR SPACE.

During the past year, under the direction of the Joint Committee on Printing, I leased 56,224 square feet of floor space for office uses and for stabling. A total of \$24,320 is now paid in rentals, and 90,042 square feet of leased floor space is occupied. All of this space is more or less distant from the main office, and makes personal supervision of the work inconvenient, while being costly because of delays, additional labor, and cartage.

INCREASE IN THE OFFICE FORCE.

Recent acts of Congress and the action of the Joint Committee on Printing have caused a considerable addition to the force of employees, through the transfer of several printing offices in the Departments to the charge of the Public Printer, and by the establishment of the division of documents; the removal of the specifications typographical rooms and the job finishing division of the bindery to rooms outside of the office makes necessary independent watch and cleaning forces there, and the change from the piece system of composition to time work has caused a considerable increase in the number of compositors. Notwithstanding these sources of increase, the average daily number of employees for the year past was but 2,677, while the average daily number for the year previous was 3,381.

CIVIL SERVICE.

During the year a movement originated among the employees looking to the extension of the civil-service law to the printing departments of the public service, and a petition, addressed to the Civil Service Com-

mission, was signed by a large majority of them, asking the President for such extension. On August 1 the President issued an order placing the Government Printing Office in the classified service. The employees have reason to hope that the result of the application of the civil-service rules to appointments will hereafter protect the force from an overcrowding of the office—a condition sure to be followed by excessive discharges. I regret to say that civil-service rules can not remove the cause for large reductions in the force after each short Congressional session.

The following tabulated statement is somewhat interesting, in view of the oft-repeated remark that this office had fallen under the “baneful influence of the spoilsman.” It shows the number of employees on the date that the civil service rules went into effect (August 1) and the number of years they have been employed:

Years employed.	Number of employees.
25 to 35 years and over	125
20 to 24 years and over	202
15 to 19 years and over	324
10 to 14 years and over	617
5 to 9 years and over	1,230
4 years and over	1,372
3 years and over	1,538
2 years and over	2,094
1 year and over	2,545
1 year and less (total number of employees on August 1)	2,736

The changes in the force for causes such as voluntary resignations, deaths, and removals for inefficiency or irregularity of habits average one for each working day in the year.

PIECE SYSTEM OF TYPESETTING ABOLISHED.

During the year past the piece system of typesetting in the office was abolished, with a view of securing greater economy, a higher standard of typographical excellence, greater harmony, a more equitable distribution of wages, and the steady employment of the maximum number of compositors. Under the part piece and part time system previously followed the large amount of tabular and “fat” copy set at piece rates prevented a fair distribution of earnings among employees of equal skill and worth and caused constant trouble in the office because of the anxiety of men to work in the piece divisions. This change has met the purpose in view. The typographical divisions are now working with the utmost harmony and zeal, and marked improvement is evident in the general work of the office and in the care taken of material.

DOCUMENT DIVISION—SUPERINTENDENT OF DOCUMENTS.

Among the several new duties imposed upon the Public Printer by the printing act of January 12, 1895, was the appointment of a superintendent of documents, to receive and care for all surplus public documents in the possession of Departments and offices; to assort and catalogue them; to supervise their distribution and sale; to catalogue and index monthly and annually all documents published; in fine, to render accessible to librarians and the public generally the vast store of Government publications. This work had for several years been seriously considered by Congress, and was finally placed by law under my charge for practical organization. In endeavoring to carry out the law, I concluded that in view of other important duties in connection with the administration of the work of public printing and binding, it was necessary to secure a coadjutor as superintendent of documents with superior practical ability and literary attainments. After much reflection, I appointed Mr. F. A. Crandall, of Buffalo, N. Y., a gentleman whose recommendations for the position were of the highest, and who possessed an additional qualification, viz, that he would have nothing to unlearn in order to carry out the evident intention of Congress to secure better methods and greater efficiency in the distribution of public documents. He entered upon his duties March 26, and has made most satisfactory progress in the work, although encountering many difficulties, not the least of which has been the want of convenient storage room.

With the approval of the Joint Committee on Printing, the sixth floor of the Union Building, situated on G street NW., was leased for the use of the document division. This building is said to be fireproof, and was the only available one of that nature conveniently located.

The space is, however, limited—too limited to hold all the documents committed to my charge by law—and as I have been thus far unable to secure any other suitable fireproof room or building I have deemed it prudent to refuse to accept control of a great many valuable books now in safe places in Departments and offices and remove them to a building where they would be exposed to destruction by fire.

I commend for favorable consideration Mr. Crandall's exhaustive report, annexed hereto, as to the character and amount of the work he has undertaken, the results already accomplished, and his practical and timely recommendations. (See C—Report of the superintendent of documents.)

I have to thank Congress for a sufficient appropriation, and the Joint Committee on Printing for the interest and activity they have shown in all matters brought to their attention during the past year.

In conclusion, I desire to express the deep obligation I feel to the chief clerk, the foreman of printing, the foreman of binding, the chief engineer, the chief electrician, the faithful and industrious, assistant foremen and superintendents, and the men and women whose patient efforts and skill throughout an eventful year's work have contributed to the good results accomplished.

A.—STATEMENT OF THE CHIEF ENGINEER.

SIR: In reply to your request for a brief description of the present steam plant of the Government Printing Office, I have the honor to make the following statement:

The plant may be properly described under three heads, viz., boiler plant, power plant, and heating plant. The boiler plant as it existed last winter consisted of two horizontal double-return tubular steel boilers and one locomotive boiler. The tubular boilers were erected in 1887 and 1888. These are 87 inches diameter by 18 feet long, each containing, in round numbers, 1,500 square feet of heating surface, the fire-grate surface of each being $52\frac{1}{2}$ square feet. The locomotive boiler was erected in 1891. This is 91 inches diameter by 16 feet 8 inches long, constructed of steel one-half inch thick, and contains, in round numbers, 1,600 square feet of heating surface, the grate surface being 49 square feet.

These boilers were inadequate in steam capacity to meet the power and heating demands of the office last winter. To give additional capacity to the plant an economizer was added to the locomotive boiler, increasing its capacity 1,000 square feet of heating surface. The economizer is a vertical boiler, 66 inches diameter by 12 feet high, constructed without a fire box. It is erected over the locomotive boiler, and so placed in reference to the smoke bonnet of the boiler that the products of combustion pass through its tubes after leaving the tubes of the larger boiler. The economizer is supported on an independent foundation, and imposes no weight on the boiler below.

The total heating surface of the boilers is now 5,600 square feet. Rating the double-return boilers at 15 square feet, and the locomotive boiler with its attached economizer at 12 square feet of heating surface per horsepower, the combined capacity of the three boilers is 416 $\frac{2}{3}$ horsepower. The boilers are fed by three pumps, each of which is large enough to supply all of the water necessary. Two of these pumps are arranged to pump hot water, while the third is available for cold water. All water for the boilers is forced through a feed-water heater, and heated to a high degree of temperature by waste steam before entering the boiler, thus affording a most economic use of fuel. The feed water to the locomotive boiler, after passing through the feed heater, enters the economizer, from which it overflows to the boiler below.

The power plant of the office consists of one condensing single-cylinder beam engine, 26 inches diameter of piston by 42 inches length of stroke, rated at 80 horsepower, erected in 1872; one condensing compound engine of the marine type, with pistons 18 and 34 inches diameter, having a common stroke of 18 inches, rated at 250 horsepower, erected in 1889 and put in operation during 1894, and one Westinghouse condensing compound engine, with pistons 18 and 30 inches diameter, having a stroke of 16 inches, also rated at 250 horsepower, put in operation the past month.

The steam-heating plant is designed to run on a low pressure and thus utilize waste or exhaust steam from the several elevator and feed pumps, and from pipes furnishing heat to the working divisions of the office. In extreme cold weather, when the supply of waste steam may become inadequate to properly heat the building, live steam will be delivered at low pressure to the heating mains through automatic reducing-pressure valves.

Heat is supplied to the separate divisions mainly by pipe-coil radiators placed against the side walls below or in front of all window openings. The distribution of the steam to these coils is made by a system of mains which allows steam to be delivered independently to each building. In each building the distribution is further subdivided in such a way that each floor has two or more independent sections, thus permitting heat to be supplied or withdrawn from any portion at will, and repairs to be made without shutting off the heat from an entire floor.

The radiators are each connected to the mains with independent steam and return connections and valves. By this arrangement any coil may be removed or replaced while steam is in the mains; this feature also enabling the employees on each floor to regulate the temperature as may best suit their needs.

A summary of the material used in the construction of the heating plant shows 38,000 feet of 1½-inch pipe. The mains consist of 14,600 feet of ¾-inch to 10-inch pipes, which, together with the amount in the coils, makes a total length of 52,600 feet, or nearly 10 miles.

The boilers have been recently inspected by the District boiler inspector and pronounced satisfactory.

Respectfully submitted,

GEO. E. REID, *Chief Engineer.*

HON. TH. E. BENEDICT,
Public Printer.

B.—STATEMENT OF THE CHIEF ELECTRICIAN.

SIR: Agreeable to your request, I take pleasure in submitting a description of the new electric lighting and power plant of this office, now nearly installed.

The plant consists of one 187½ K. W. direct-connected generator and three 80 K. W. belted generators, all of the most improved compound multipolar Westinghouse type. The 187½ K. W. generator is directly connected with a Westinghouse compound condensing engine of 250 horsepower. The two machines occupy a floor space of 21 by 7½ feet. The 80 K. W. generators are driven from a line shaft, which is belted to a 250-horsepower compound condensing engine of the marine type. Friction-clutch pulleys are used for driving these generators, thus giving the greatest flexibility to the plant by allowing the stopping of any one of the three generators while the others are in use. These, independent of the direct-connected generator, are capable of furnishing all the necessary power as well as light needed in the office in case a total breakdown of the direct-connected unit occurs. The total capacity of the four generators is 8,500 50-watt 16-candlepower incandescent lamps—more than sufficient for all lighting and power demands.

The peculiarities of the work of the office make necessary a sectional rather than a general system of electric lighting. With this end in view, the wiring has been done entirely on the "crib" system. This affords a uniform distribution of light throughout every division of the office, the rooms farthest away from the generator station being equally as well lighted as those near by. So perfect is this result that nowhere in the building does the variation from the switch board to lamp exceed 2½ volts, nor is the variation in any one room ever more than one-fourth to one-half volt, no matter how many or how few lamps may be burning on the circuit. The capacity of all main trunk lines and feeders is so large that circuit regulators on the switch board are not required.

To make up any loss from generator to lamp the generators are overcompounded 1½ per cent, and their makers guarantee that no greater loss than 3 per cent will occur from full to no load. Thus there will be a constant voltage at the lamps, whatever may be the existing conditions, insuring full candlepower and the long life of the lamps. We are thus able to get full benefit of the current generated and not have a considerable portion of it consumed in rheostats that the system may be kept in balance.

The crib system has been extended to vertical mains as well, thus allowing the disconnecting of one side of the circuit without interrupting the service throughout that circuit while in use. The crib system of wiring not only increases the flexibility of the plant, but minimizes the possibilities of interruption of work, and also equalizes the distribution of current to the lighting mains.

In carrying out your instructions as to the application of electrical power, the office will use at present seventy Crocker-Wheeler electric motors of one-sixth horsepower to 30 horsepower, aggregating 225 horsepower.

To secure full protection against any possible interruption of work, except through a total failure of steam power by accident, a suitable electrical switch board of special design became necessary. This board is one of the largest and most complete in the country. It presents many peculiar features and fully meets the exactions of the service here, which will not permit interruptions during the sessions of Congress. The switch board is divided into five panels—three for lighting and two for power. It is so constructed that an additional panel may be made without changing any of the connections. There are two sets of bus bars extending the entire length of the board—one for the use of the lighting circuits and the other for power circuits. By the use of a switch the two bus bars can be connected so as to make one continuous bus bar, and power and lighting circuits may be run together and from one generator should occasion therefor occur. Each generator is connected to the switch board by a double-pole double-throw switch, thus allowing any generator to be used for power or lighting as occasion may require. Each feeder circuit is also controlled by a double-pole double-throw switch, giving every circuit throughout the building two sources of current and providing for an uninterrupted system either of light or power. Under normal conditions all lights will be run from one set of bus bars and the power circuits from the other, but when both power and lighting load become sufficiently small so that the combined demands of both are not in excess of the power of one 80 K. W. generator all work will be so divided by the switch board as to make it possible to run everything from one generator. This board allows the changing from one generator to the other without any interruption to the service in the building or the running of the generators in multiple.

Each panel is provided with a standard Weston volt and ammeter. Each power circuit is supplied with a round pattern Weston ammeter. There is also connected to the lighting service a recording voltmeter. For testing insulation of each circuit there is a special reading in ohms marked on one of the voltmeters, thus enabling a daily log to be kept of the condition of each circuit of the plant. The measuring will be done by drop-of-potential method, and not only will each individual circuit be tested, but each leg of each circuit, a suitable switch being provided for the purpose.

More than 20 miles of wire of the best kind was used in the circuits, and during its erection full use was made of every precaution known that would render property and life more safe.

The insulation test of this entire system with all cut-outs in circuit will reach, under ordinary conditions, 8 megohms.

One of the special features of this electrical plant is the transmission of power by electricity. In all cases where it was possible so to do without interrupting work we have connected motors direct to the machines themselves, doing away entirely with the use of belting and its attendant losses, disadvantages, and dangers. We find that the printing presses and some of the other large machines were never driven to their full capacity by belts, and that since they have been geared direct to the electric motors nearly double the amount of work has been done on some of them.

In gearing motors direct to printing presses we have not only secured the advantage of displacing belting, but enabled the pressman, by the use of a reversing regulator, to have absolute control of his press when making ready, and move the bed plate forward or backward, as desired, and without the help of a laborer. The speed of the press can also be regulated at will.

The two principal advantages of electric motive power over shafts and belts are the reduction of the friction load to a minimum and the independent working of each machine. Under the shaft-and-belt system the breaking of a belt often necessitated the shutting down of all the mechanical divisions.

To each motor is attached an automatic cut-off, so that accidents are not liable to occur through carelessness of employees. A still further safeguard is the automatic circuit breaker, which prevents the overloading of motors.

In the erection of the plant every approved electrical device has been used. The short period during which the new plant has been in operation prevents full statements as to the amount of current and power consumed by each division of the office and the actual amount of power saved, as compared with the old system.

Respectfully submitted.

W. H. TAPLEY, *Chief Electrician.*

Hon. TH. E. BENEDICT,
Public Printer.

C.—REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

OFFICE OF SUPERINTENDENT OF DOCUMENTS,
GOVERNMENT PRINTING OFFICE,
Washington, D. C., October 1, 1895.

SIR: The provisions of the new printing law, directing that the accumulations of public documents in the several Executive Departments be turned over to the custody of a superintendent of documents, would be meaningless unless an improvement in the method of storing and arranging such accumulations was intended to be made. For various reasons, mainly, I suppose, beyond the control of the officers in charge, many thousand volumes had for many years been so stored that they were inaccessible for use, distribution, or sale, and were going to decay because of dampness, insects, etc. Some new device was a necessity, if anything was to be gained by the transfer of the accumulated documents. So far as I know, there was no precedent for handling just such a literary stock, consisting, in the first place, of a great many different kinds of books, and, in the next place, of a great many duplicate copies of many of them, all of which ought to be as readily accessible as the contents of a well-catalogued library.

After some consideration I devised a sort of combination of library "stacks" and storage "bins," of which 78 have been built, containing 2,340 bins, each of which will hold from 75 to 300 books, according to the size of the volumes, giving room for more than 300,000 documents, at a cost only about a fifth as great as that of shelving of equal capacity. These answer perfectly the purpose of classified storage for which they were designed. But they cover a great area, and to make their contents immediately and surely available a key was needed. This was provided in a library exclusively of public documents, to contain one copy of every publication of the Government of which any duplicates were in my possession. When this library has been properly classified and catalogued, its shelves will unlock the treasures of the public documents and make all their contents immediately and practically available for the uses of the officers of the Government and the public at large.

This seems a simple and easy solution of the document problem. That it is, however, not quite so simple as it seems, may perhaps be inferred from the fact that it has not sooner been adopted. As a matter of fact, it involves an enormous amount of labor, and it needs to be skilled labor. Correct cataloguing of publications is a work requiring a high degree of skill and accuracy, and the cataloguing of public documents is the toughest problem that cataloguers have to encounter. Many have tackled it, some more successfully than others, but it is an open question whether an absolutely successful effort at a general catalogue of public documents has yet been made, even on a small scale.

In the pursuit of the plan I have outlined I soon found that a fragmentary library catalogue, covering only such documents as I happened to have duplicate copies of for sale, would not at all meet the demands of the case. The inquiries which are already coming to this office from every part of the country require, for their answer, information as to all documents of the Government, recent and ancient, and if these documents can not be furnished by this office, then the inquiry is, Where is the next most likely place to get them? If they can not be had anywhere, then can they be consulted and their information gleaned in the document office?

To enable this office to do the work which public officials and the libraries of the country and the general public expect and require, it should have a full set of the public documents from the beginning and have it thoroughly catalogued. To make such a collection means great and continuous vigilance in collecting and labor in cataloguing. I believe it is still possible to make a substantially complete collection, and to do it much more speedily than might at first thought seem practicable. Two or three years of active effort in this direction, with the opportunities which this office has for interchange with libraries and collectors, would work wonders, and if it could be supplemented by the use of a small appropriation for the purchase of such rare public documents as are not to be otherwise obtained, success might be predicted with a good deal of confidence. Nothing need be said as to the value of a complete and well-catalogued library of public documents, so stored that not only the library, but also all the existing duplicates, should be readily accessible. Such a collection would be one of the literary and historical treasures of the Government and of the country. Every day's delay increases the doubt and difficulty of making such a library.

This is a very brief description of what I venture to believe is really a comprehensive and effective plan for making the public documents as accessible and useful as any other class of literary publications, instead of leaving them, as they now are, a riddle and a puzzle not only to the unlettered masses of the people, but even to most trained librarians and literary workers.

No very great progress has been made with this plan, for several reasons. The bins have been built, and many thousand books have been received, cleaned, assorted, and placed in them, but the library which is to be the key to their contents has been delayed by several causes. In the first place, I was entirely unable to find anybody who could tell me how many volumes I must provide shelf room for in order to make as complete a collection as possible of public documents. Only one recognized authority on the subject ventured an opinion, and he, when I told him I had made up my mind to provide for 10,000, predicted that I would never be able to find so many different volumes. However, that amount of shelving was provided, and it had not been up a fortnight before it was evident that it would not be sufficient. It was decided to increase the capacity of the library 50 per cent, but there has been delay in securing the additional fireproof shelving, and that has been one cause that has hindered the library organization.

Another and a more powerful cause has been the preparation for publication of the various catalogues which the law requires this office to prepare.

CATALOGUES FOR PUBLICATION.

When the new printing law was originally introduced, early in the first session of the Fifty-second Congress, it provided that the superintendent of documents should make an annual catalogue (or "comprehensive index") of public documents, beginning with the Fifty-third Congress. Had the bill then become a law the work required under this provision would have been done after the law supplying the material with which to do it had become operative, and the cataloguers could have kept abreast of the Congress and have had their work ready for issue soon after the adjournment. But the law did not pass till the third session of the Fifty-third Con-

gress, and the provision as to when the cataloguing should begin stood then just as it had when the bill was first introduced. Thus the cataloguing started two years behind, and covered a period during which there had been no law directing Department officials or the Public Printer to furnish the material to be catalogued. Not only was the time in which to do the work thus very much limited, but the cataloguers were dependent on the courtesy of public officials for copies of the documents which had been published in the years 1893 and 1894. Such courtesy was, however, found to be bountiful and generous, and it is believed that but few of the publications of the period covered by the life of the Fifty-third Congress have been withheld.

But courtesy could not supply the lack of time. The work of cataloguing the documents published from March 4, 1893, to June 30, 1895, for which a year would not have been a day too much, was crowded into little over four months, and to accomplish it in that time the force which had been assigned to the work of making the library and its card catalogue had to be pressed into the printed catalogue service. This is the chief reason why the library work is less advanced than it was hoped it might be by this time.

Cataloguing is the worst kind of work to hurry, and if defects shall be found in the catalogue volume of the documents of the period of the Fifty-third Congress it may be set down as a certainty that they would have been less numerous if the time in which the work was done had been more adequate to the task. For accuracy in recording minute details plenty of time must be taken, and cataloguing is wholly the recording of minute details.

The plan on which it is proposed to pursue the cataloguing of the public documents contemplates that the force employed on the catalogues which are by law required to be printed shall begin at the Fifty-third Congress and work forward, keeping pace with the future publications of Congress and the Departments, and issuing an annual volume of the "comprehensive index" promptly following the adjournment of Congress each year. At the same time it is contemplated that the library force shall begin at the Fifty-second Congress and catalogue backward, going as far as they can find anything to catalogue, and thus making the two branches of the cataloguing work connect with and supplement each other. The catalogue of the public documents printed during the period from March 4, 1893, to June 30, 1895 (being the "comprehensive index" provided for in section 62 of the act providing for the public printing and binding and the distribution of public documents, approved January 12, 1895), is at the date of this report substantially complete, but it must have thorough revision, and it may therefore be some weeks before it can be sent to the printer.

The Monthly Catalogue provided for in section 69 of the act hereinbefore referred to has been before the public since early in August, and has been well received. As the law was approved in January, and as the monthly catalogue of public documents which had been issued by private citizens for ten years past was discontinued with the close of the year 1894, it was deemed best to begin the new catalogue with the calendar year 1895. Accordingly the first number was made to contain (so far as they could be collected) the titles of the documents printed during the month of January, 1895, and the successive numbers have been issued as rapidly as possible, each number cataloguing the publications of a calendar month. The numbers for January, February, March, April, May, and June have now been printed, and it is hoped that by the 1st of December the whole number up to that time will have been published and that thereafter the catalogue may appear early in each month with a full list of the publications of the preceding month, as contemplated by the law.

The successive monthly issues have been sent to the Members of the Fifty-fourth Congress, to all the Departments, bureaus, and offices of the Government which issue public documents, to the officers of the Engineer Corps, United States Army, to the State and Territorial libraries and the libraries on the designated depository list,

and to those citizens who have asked for them. Of these latter there are at this date about 600, and they represent every part of the country and several foreign countries. As the edition of the Monthly Catalogue is small and the demand for it promises to be large, it was thought advisable not to make up a list of people to whom to send it who had not asked for it, and who might not care for it when received. Beyond the foregoing list, very few copies have been sent except to those who had asked for the publication, and who, it was therefore assumed, would surely be interested in it.

I think it reasonable to suppose, from the character of the letters received, that the monthly catalogue has tended to increase the sale of documents in many of the bureaus and offices. I take room to quote only a couple of these letters as samples. A Slatington manufacturer writes:

I find it very useful, and am much pleased with the character of its get-up, well understanding the difficulties you have to meet and overcome.

A Pittsburg civil engineer writes:

I find it invaluable, and have been enabled by its means to purchase many books and papers which I would have hesitated to ask for without sending proper compensation. Let the good work go on.

The consolidated index, to include only the Congressional documents, has not yet been issued nor any work done on it. This office was not organized at a sufficiently early day to undertake such an index of the documents of the third session of the Fifty-third Congress with full promise of success, and it was accordingly thought advisable to wait until the Fifty-fourth Congress began its work and then start at the beginning of that Congress and try to keep up with the current issues of documents from day to day.

DISTRIBUTION TO LIBRARIES.

While the making of catalogues and the creation of a complete document library seem to me to be the most important functions intrusted to this office, yet the distribution of the public documents to the public libraries of the country, where they are made available for the uses of all citizens, is of hardly less value and responsibility. The list of designated depository libraries was created under authority of sections 501 and 502 of the Revised Statutes, and nominally consists of one designated by each Representative in Congress, one named by each Senator, one specially designated by statute (the Antiquarian Society, of Worcester, Mass.), and the official libraries at each State and Territorial capital. To these were added by the act of January 12, 1895, the libraries of each of the eight Executive Departments and of the Military and Naval academies. If all the designations were full the total would be 507, but so many of the Congressional districts have remained unsupplied through the failure of their Representatives to make a proper designation that the total has stood at about 420. The list as it stands at present is printed as an appendix to this report and numbers 419. (See Appendix D.)

Under the old law the number of copies of the Congressional documents furnished to supply this list was 420 of the Senate documents and 470 of the House documents. Just why it should take 50 more of the House documents than of the Senate documents to supply the same list I am at a loss to understand, and whose brilliant idea it was that the volumes should be supplied in these unequal proportions I have been unable to discover, but the effect of its working during a series of years was brought to my attention when I began to receive the accumulations of documents from the Interior Department. Hundreds of boxes containing sets of the House documents for twenty years past came to hand, but the Senate documents of the same years were in nearly all cases entirely lacking. The rule of supplying 420 for the Senate and 470 for the House is still observed, but will cease when the publication of the documents of the Congresses preceding the Fifty-fourth has been completed. Under the new law the supply to this office for distribution to the depository libraries and

for sale is directed to be 500 copies. Even this number will not be sufficient if all the Representatives in Congress exercise their right to name a library for their districts to receive the public documents. In view of the authorization given to this office to sell documents and the importance of preserving some stock of duplicates against future demands, it is probable that 600 would be a more suitable number to send to this office in the future, and I respectfully ask that legislation for that purpose be recommended.

It has been held that the intention of the law was that a library once designated as a depository should remain on the list until removed for suitable cause, such as failure to care for the books and make them available for public use or persistent refusal to acknowledge the receipt of the books sent. The reason for this continuance of the libraries on the list is obvious. In no other way could sets of the public documents be accumulated. If the designations were to be changed whenever a new Representative came in, many libraries would have comparatively useless fragments of the document set, and no complete collections would exist anywhere.

By the new law the superintendent of documents was directed to investigate the condition of the depository libraries and strike from the list those not college libraries which had less than 1,000 volumes other than public documents or had ceased to be maintained as public libraries. The investigation has been made by sending blank forms upon which the librarians were asked to answer questions as to the number of volumes they had other than public documents, the number of public documents, whether they were catalogued and classified, whether the documents were open to the public for reference and circulation, by what means the libraries were supported, what hours they were open, what number of duplicates of public documents they had in their possession, etc. When librarians failed to respond to repeated appeals the final step taken was a letter to the postmaster of the town where the delinquent library was situated, asking for information. In only half a dozen cases was this step necessary. As a result of persistent effort all the other libraries now remaining on the list were heard from in some form or other, and up to this date none has been removed from the list for failure to communicate with this office. The few removals that have occurred have been from other causes, and in each case the Representative of the district in which the removed library was situated has been notified and asked to designate another library as a depository of the public documents.

In considering the matter of removing libraries from the depository list for failure to have at least a thousand books other than public documents, the exemption from the effect of this provision granted by the law to "college libraries" has been construed to cover school libraries of all classes. If it were not so extended, but were strictly enforced against the libraries of all educational institutions below the grade of colleges, a large number of public and high school libraries would be excluded altogether from the receipt of the documents. In many cases this would be a hardship, for in new and small towns the public documents are often the chief if not the only source of supply of books other than school text-books for the school libraries. In a pinch public documents are better than no books, though a library altogether made up of them can not be considered exhilarating literary fare for school children. It is a pity that these school libraries, which have small facilities for caring for books and small use for those of a political or statistical character, should be put upon the same list and compelled to receive the same embarrassingly large number of documents that are sent to the great libraries in the large cities and at the chief universities. There should be a discretion lodged somewhere to send to these schools the books they want, and ask for, and can use, and not compel them to take those for which they do not ask, which they can not use, and for which they can not even provide proper shelter and care. I have, in fact, without any special authority to do so, exercised a certain discretion in this matter by making up a supplementary mailing list, on which are placed the names of certain schools which stated that the

whole number of documents was a burden too great for them to bear, while certain publications of a scientific and educational nature they were desirous to have. Only the documents they have especially asked for are sent to the libraries on this list. It is not, however, a long list, but if the libraries could be carefully canvassed on this head no doubt the list would be much extended. It is evident without argument that the documents would be much more highly appreciated if only those were received which could be made useful. The profusion with which public documents have been and are furnished to those who do not want them, as well as to those who do, has obviously had much to do with the unfavorable opinion concerning them that is entertained by many people.

I am glad to be able to report that this contemptuous opinion is not generally shared by the libraries of the country. In a statistical circular sent to all the depository libraries this question was asked: "Is it your desire to have your library continue to receive all Government publications to which it is entitled, or do you wish to discriminate in favor of special reports? If the latter, enumerate such reports." In a great majority of cases the reply was that the library wanted all the public documents it could get, and many expressions of appreciation of the value of the documents were appended. The larger and better the library, the more sure it was to ask for all the public documents without exception.

An important change in the distribution to libraries will be made by the new law. It has not yet taken effect, but will do so in relation to the documents of the Fifty-fourth and subsequent Congresses. Section 54 provides that "all of the 'usual number' shall be printed at one time," and that "in binding documents the Public Printer shall give precedence to those that are to be distributed to libraries and to designated depositories." Heretofore only that part of the "usual number" known as the "up number," which is the number sent up to the Capitol in unbound form, has been printed when the various documents were put to press. The remaining part of the "usual number," which is known as the "reserve," has been printed at a later time, how much later depending on the condition of the work in the Government Printing Office. If that vast establishment has been pressed with orders for immediate delivery, the printing of the "reserve" has been delayed. Frequently this delay has been great, extending not only to months but to years. As the "reserve" is the source of the library supply, this matter is of great importance to that large part of the public which depends on the public libraries of the country for its knowledge of the public documents. When the "reserve" is all printed the first time the forms of the public documents are put to press, and when the first volumes of the "reserve" that are bound become available for library supply, the libraries will receive their books, always months, and frequently years, earlier than has been the case hitherto. This is a matter of the first importance. A book which is of the utmost value if it can be received promptly may be of little value or even of no value at all if it can not be had until six months or a year or two hence.

It was evident to me at once that if these new provisions of law were to be of the expected value there must be a radical change in the method of forwarding books to the libraries. Heretofore it had been the custom to hold the volumes as received from the Printing Office until enough had been received to give each library a mail sack full, which was from 26 to 28 volumes. This took on the average three months, and caused the books to be withheld from the libraries for about that time after they had been printed and bound. As soon as the distribution came into my hands I began sending the books forward singly as fast as I received them. After this had been going on for a few weeks I sent to the libraries a circular of information as to the document service, in which, among other things, I asked them for an expression of opinion as to the change in the method of distribution. There was a large number of replies, only two of which expressed preference for the old system, and one of these afterwards withdrew that preference. Several selections from the letters of prominent librarians are attached to this report as Appendix B. They indicate that the

changes of law and practice which will result in an earlier delivery of the public documents to the libraries of the country will be received by librarians with the liveliest satisfaction and will be of great benefit to the public.

Since the new method of distribution was put in force the depository libraries have received a new public document almost every day. Thus this office keeps in constant touch with them all, and nearly all are prompt and businesslike in returning the receipt postal card which is inclosed in every volume.

It is contemplated by the new law that the depository libraries shall receive many more public documents hereafter than had formerly been sent to them. The latest issues of the pamphlet laws, the Statutes at Large, and the bound volumes of the Congressional Record have been sent to them recently. These publications have not formerly been sent to the libraries. By section 73 of the new printing law it is provided that the Secretary of State shall cause to be printed as many volumes of the Revised Statutes and Supplement No. 1 of the same as will supply the depository libraries and certain courts, etc. It is the evident intention of the law thus to give the libraries a full series of the permanent laws by supplying the Revised Statutes to 1891 and the Statutes at Large thereafter. This would have been accomplished had the printing bill become a law during the Fifty-second Congress. As, however, the law did not pass till the Fifty-third Congress, the existing provisions of law will leave the libraries without the laws of the Fifty-second Congress. The break in the set may be supplied by supplemental legislation authorizing the supply to the libraries of either volume 27 of the Statutes at Large or Supplement No. 2 of the Revised Statutes.

Section 58 of the new law has this provision, which has not yet been acted on:

Of all publications of the Executive Departments not intended for their especial use, but made for distribution, 500 copies shall be at once delivered to the superintendent of documents for distribution to designated depositories and State and Territorial libraries.

Under this provision no copies have yet been supplied to this office, and I presume the reason is that it presents considerable difficulties of interpretation. Shall 500 extra copies be printed for this purpose, or shall 500 copies be taken from the Department editions? If the former, considerable expense will be incurred; if the latter, the Departments might often be embarrassed. When this clause comes into operation, under either interpretation, the libraries will receive a largely increased number of publications, mainly pamphlets, but often of great and timely interest.

CLEARING HOUSE FOR LIBRARIES.

Mr. John G. Ames, as superintendent of documents in the Interior Department devised a plan of clearing documents between libraries that proved of general benefit. I have been asked by several librarians to continue it, and I needed no urging to agree to do so, as its advantages are obvious, and it is only through this office that such a plan could be worked. The depository libraries receive from this office only one copy of any public document; nevertheless they accumulate great numbers of duplicates. This results mainly from the favor of Members of Congress, who apparently seldom stop to inquire whether a library to which they wish to send a book is a designated depository and therefore sure to receive the same book from another source. Many of the depository libraries are also on the list of the Smithsonian Institution and various bureaus, and receive their reports first in cloth and afterwards from this office in sheep. In some cases these duplicates have been accumulating for many years, and among them are found some of the earliest publications of the Government. Many of the libraries, while having duplicates of some documents, have no copies at all of others, making breaks in their sets which they are desirous to fill. Other libraries may have duplicates of those which the first-named are lacking and themselves be lacking those of which the others have a surplus. This office undertakes to receive the duplicates from those libraries which wish

to be relieved of them and to supply the deficiencies of those which have broken sets. To enable this to be accomplished with ease and certainty Mr. Ames compiled a check-list of public documents on which librarians might indicate by a simple check mark the documents they lacked to complete their sets. The first edition of this checklist is exhausted. I have a second and considerably enlarged edition of it in press. It will make a volume of considerably over 200 pages, packed with information relating to the public documents, and I hope will be found useful, not only by librarians, but by all who have occasion to consult public documents.

A NEW IDEA CONCERNING GRATUITOUS DISTRIBUTION.

The number of duplicates which accumulates in the libraries is so great—one library recently reporting as many as 5,000—that one can hardly become conversant with the facts without reflecting whether the system of distribution of public documents to citizens in general might not be improved. Suggestions concerning it do not properly come within my province, but one idea that has come to my notice seems to have in it at least the germ of an improved system, and I am therefore encouraged to mention it here. It contemplates doing away with the direct gratuitous distribution of books by members of Congress and other officers of the Government, and substituting the distribution of blank orders for books, to be filled up by the recipients with the names of the books desired, and then forwarded to one of the document rooms, where the order would be filled and the book sent to the proper address. An allotment of these blank orders might be made as readily as an allotment of books, with the advantage that if they were not used either by the Member or by the constituents to whom they were sent, then little loss would be incurred. The plan would have the advantage also of enabling the constituent to get the book he might want, instead of having sent to him some volume for which he did not care. Most constituents would probably appreciate as highly the compliment implied in the gift of an order good for any book published by the Government which they might desire as they now appreciate the gift of books which are of no possible use to them. There are citizens who would be glad to receive a volume of the Chinook texts or the Comptroller's statistical report on the national banks, but to the average citizen the compliment implied in the gift of these and similar technical volumes is dubious. The sending of orders for books instead of the books themselves might cost the sender some trouble in answering inquiries and supplying catalogues, but if a million or two were saved to the Government that fact might be accepted as an offset. The probability is that orders to twice the number of the books now printed might be sent out, and that half the present number of books would supply the demand thus created. Perhaps the plan is not practical, but it has seemed to me worth at least mentioning for the purpose of bringing it to the attention of all who may choose to consider it in connection with the great and growing cost of the Government printing and the admitted need of some improved plan of accomplishing the same end.

DISTRIBUTING THE RECORD.

One provision of the new printing law directs me to distribute sets of the Congressional Record to eight libraries in each Congressional district and Territory on the designation of the Representatives and Delegates. This was taken to begin with the third session of the Fifty-third Congress, and the designations to be made by the Members of that Congress. I have succeeded in getting designations from 201 Members, a considerable percentage of whom, however, failed to designate the full number of libraries which they were entitled to name. I very much doubt whether there are many Members who have in their districts as many as eight libraries of a kind that can make profitable use of a set of Congressional Records. If the libraries were to be found, I do not see how this law would give them sets of the Record—and fragments of it have little value for library use. Many schools and

nominal libraries which never had a volume of the Record will receive the four parts and index for the third session Fifty-third Congress—and will never get any more. The designations for the distribution of the set for the next session will be made in many instances by different Members, and of course many libraries not now named will then be named, while many that are now named will then be left out. I would respectfully recommend that if it be thought advisable to continue this distribution of eight sets of the Record to as many libraries in each district, the same rule that is now followed in relation to the designated depositories and the Naval War Records be adopted—namely, that a library once designated remain on the list until removed for cause. Only in this way can continuous sets of the Record be secured by the libraries.

UNIFORM TITLES.

A most salutary provision is that found in section 81 of the new printing law, as follows:

Every public document of sufficient size on any one subject shall be bound separately and receive the title suggested by the subject of the volume, which shall be the chief title, and the classification of the volume shall be placed on the back at the bottom, as simply indicating its classification and not as a part of the title.

This is not, however, a provision that will execute itself, and unless it is made the specific duty of some employee of the Government to attend to its execution it may fall short of accomplishing the good in the way of simplifying the use of the public documents that is expected of it. I can not learn that it has hitherto been anybody's especial duty to furnish the inscriptions for the backs of the public documents, technically known as the "binder's titles."

I do not know that it is even anybody's specific duty to furnish the title-pages for the Senate and House documents and reports. When the title-page is found to read, as it does in hundreds of Congressional documents, "Index to the Executive Documents of the House of Representatives, in 39 volumes" (or whatever the number of volumes for the session may be), instead of "The Executive Documents of the House of Representatives, in 39 volumes," there is nobody to hold responsible for the blunder. An index in 39 volumes is such an evident absurdity that it might be supposed a title-page proclaiming the existence of such a series would be at once condemned and its repetition forbidden, but it can be found in the documents for many years. From the Forty-fourth to the Forty-ninth Congress, inclusive, it appeared in nearly all of them.

NOTATION AND TERMINOLOGY OF THE CONGRESSIONAL SET.

The question how best to do away with the bewildering congeries of volumes, numbers, and parts that now makes the set of Congressional documents a wonder and a terror to the investigator, and what to substitute for it, is an inviting subject. The absurdities of the present notation are so patent that the neophyte is likely to think it must be easy to substitute something less complicated and more intelligible. A study of the subject will not lessen one's idea of the absurdity of the present method, but it is likely to increase one's idea of the difficulty of providing an acceptable substitute.

Of course the present system was not devised by anybody. There was never anybody who could have devised it. Like Topsy, it "just growed." In the infancy of the Government, when its publications were few and small and the reports of its public servants were meager, single numbers and single volumes were sufficient for all needs. As reports and transactions of all kinds became more numerous and more voluminous, the expedient of dividing documents and volumes into "parts" was naturally enough resorted to by printers and binders to overcome mechanical difficulties. The pity is that printers and binders were permitted to do this without a scholarly supervision that might have protected the English language from such

violence as it has suffered at their hands. Nowhere else is a set or series of books called a "volume." Nowhere else is a separate book printed in the English tongue called a "part." The terms used in describing the publications of the Government have no place in the dictionary, and their meaning in this use is totally different from their meaning in the general usage of the people. This nomenclature and notation perhaps reach the height of their absurdity in the series known as the "Message and Documents," which, though it comprises a score of volumes, has been all called House Executive Document No. 1. This No. 1 is, however, divided into eight parts, and several of these parts are divided into volumes, which are again divided into parts. Thus volume 4 of the House Executive Documents is part 2 of Document No. 1, and it is also volume 2 of part 2, and it is also part 2 of part 2 of volume 2. Its full designation is part 2 of part 2 of volume 2 of part 2 of No. 1, and volume 4. The same book is at the same time three parts, two volumes, and one number. Volume 14, House Executive Documents, goes a step farther, having seven designations, namely, part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, and volume 14. Of course all these designations are never put into practical use. There is probably not a man living who could tell off hand what is the subject-matter of part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, volume 14, of the House Executive Documents of the Fifty-first Congress, second session. One might as well try to commit to memory the lettering on a Chinese tea chest as charge one's mind with such a rigmarole.

In no other literary nomenclature in the English language is it found necessary to give one book more than two designations—the series and the volume. In the Congressional document designations the good English words "series" and "set," which mean a consecutive collection of volumes, have been discarded, and the word "volume," which means only a single book, and can not be made to mean anything else, has been used to mean "set" and "series." This would be confusing enough, but the confusion is increased by the fact that at the same time the word volume is also used in its correct meaning, and simultaneously the word "part," which in other literary terminology signifies a portion of a volume, is used to mean a whole volume or distinct book.

If each separate book were to be called a volume, and each set of books were to be called a series, and each so-called part were to be a part of a book and not a whole one, then the people in general would understand the public documents much better than they now can. Then if each book were to appear in only one edition, bearing always the same title on its back and having always the same kind of binding, the mystery and difficulty of the public documents would substantially disappear. So long as there is a Department edition, and a Bureau edition, and a Message and Documents edition, and an Executive Documents edition, all of the same book, yet all, in outward appearance, totally different, it will be impossible for anybody to understand the public documents without giving to the study of their peculiarities more time and thought than the average citizen can afford.

The improvement of having the same book always bear the same title on its back is provided for by section 81 of the printing law, but the improvement of making only such use of the terms "number," "series," "volume," and "part" as will accord with the general usage, and therefore be intelligible to all, is difficult, because of the extreme diversity in the size of the documents. If they were all small, so that several were required to make a volume, or if they were all large, so that each would fill one or more volumes, then it would be easy to devise a logical and consistent plan of naming and numbering; but as many of the documents are very small and many are very large, and the two kinds must be brought under one system, the problem is difficult, if not impossible, of solution. It would be as absurd to call a second sheet of a report or resolution "volume 2" as it now is to call a distinct volume having a thousand or more pages "part 2." I have read the suggestions heretofore made for new methods of naming and numbering the Congressional documents, but it does not seem to me that they meet all the difficulties.

There is ground for a hope that many of these difficulties will disappear under the operation of section 81, which not only requires that the same book shall always have the same title, but also abolishes the distinction between "Executive" and "Miscellaneous" documents, and leaves to each branch of Congress only two sets, to be called, respectively, "Documents" and "Reports." After the operation of this important section has been tested and observed it will be easier to judge what further reformation, if any, may be needed to make the method of publication of the Congressional documents more coherent and more intelligible to the general public.

CATALOGUING OF PUBLIC DOCUMENTS IN GENERAL LIBRARIES.

I have been moved to talk of this subject, the discussion of which is not strictly within the purview of my official duties, by the communications I have received relating to it from the librarians of depository libraries. I have not canvassed the libraries as to the need of document catalogues, but many of them have written to me concerning it. The peculiarities of the public documents make it difficult to catalogue them, and it is apparent that a collection of documents uncatalogued is about as unwieldy and unusable a sort of literature as a library could well have in its possession. To search for anything in a set of documents without the aid of a catalogue is a hopeless task, except for the few experts who, by years of familiarity with this class of books and by exceptional gifts of memory, have come to know their contents as a blind man may come to know a road over which he travels often. To the blind man it is as easy to travel by night as by day, but people who have eyes must have a lantern. So the great mass of people must have a catalogue if they are to get any good out of the public documents.

Among the questions I have asked of the depository libraries are these: "Are the public documents in your library catalogued?" "Are they classified?" Of the 322 libraries which had answered these questions at the date of this report, 153 claimed that their public documents were catalogued; but it is a moral certainty that with two-thirds of them cataloguing means something quite different from what it means to the trained librarian. Writing down the names or numbers of the documents in a book is not cataloguing, and gives little or no help in finding the contents of the volumes. Many replied that their books were catalogued, but not classified. Of course the best catalogue in the world would be of little use to a library that was not classified on some plan or other. Classification comes before cataloguing, and when a librarian says his public documents are catalogued but not classified, the only conclusion to be drawn is that he does not know what cataloguing is in the modern sense. When a librarian who says without qualification that his public documents are catalogued writes by the same mail, as one did to me, "I have not the means of knowing how many volumes we have, either of Government or otherwise; they are classified after a fashion," I can not believe that his cataloguing is of a kind to be serviceable to those who use his library.

It is not very difficult to tell, from the character of the library reporting, how much weight to give to the report that its public documents are catalogued. Many of the oldest and best endowed libraries in the country, in which one would suppose everything would be thoroughly catalogued as a matter of course, report that their public documents are not catalogued, while many small and struggling libraries, which are not able to maintain any sort of cataloguing staff, report their documents all catalogued. It is my opinion that, at the most liberal estimate, there can not be more than 50 of the 419 depository libraries which have the public documents in their possession so well and intelligibly catalogued that they can readily find whatever they wish to find in them. How many libraries there may be not on the depository list which have their public documents equally well catalogued I have no means of knowing, but I think there can not be many, for most of the large libraries of the country are on the depository list.

Many librarians, who are more modest because better informed, report to me that their public documents are "crudely" catalogued or "partly" catalogued. Others, more modest still, confess their inability to grapple with the work. The president of a normal school writes:

This is a school. It has a small library for the use of students. We do not see any value to us in the volumes we receive from you, and yet I have not felt at liberty to stop their coming, as somebody wiser than I may make them useful in the future. The volumes are all cared for, but not labeled or catalogued. I hope you will not conclude from what I write, that I do not think these documents very valuable. The trouble I have is to catalogue and label them in a way to utilize them.

A State librarian writes:

The books have never been catalogued, so it is impossible for me to give the number.

The librarian of an Ohio college says:

As with other librarians, the matter of how best to catalogue and classify these documents has been a matter of perplexity. We would hail with delight any help in this.

An excellent free public library in California reports:

As to the matter of cataloguing public documents, to do justice would cost more than our annual appropriations.

From a long-established public library in Michigan comes this testimony:

If only some uniform system of cataloguing the contents of these books could be devised, both simple and comprehensive, what a working factor they would become immediately!

There have been many similar expressions in my large correspondence with the libraries, but I have been more fortunate than is often the case when a subject of general complaint is the topic. I have received not only the complaints but the cure for them. It came from Mr. M. D. Bisbee, the librarian of Dartmouth College, who said in the briefest possible form of words at the bottom of a letter:

I hope to see the day when the Government will send complete catalogue cards with each publication.

To my mind, this brief suggestion promises more than anything else that has been proposed in the line of making the public documents accessible, intelligible, and useful to the public. If catalogue cards for each volume were to be inclosed in the volume itself when it was mailed, it would at once on its arrival become available for the use of the library and the community in which the library was situated. If the library had no card catalogue it would be encouraged and instructed to make one, and if it never acquired any other cards it would by merely saving those received with the documents soon accumulate a catalogue of that part of its library at least. There would be few libraries that would not have pride and care enough to arrange in alphabetical order the cards that were received, and that would be all the treatment they would need to make them as available in a school library in a small village as they could be in the richest library in a great city. By this means also a uniform and recognized method and standard of cataloguing public documents might be established, to the great advantage of all libraries.

In no other way, I believe, could the public documents be made so immediately and so completely available for the use and instruction of the people. The cost of it would be comparatively small. The cataloguing is required to be done now, and the only additional cost would be that of printing the cards, while it would save the cost of cataloguing public documents in the libraries, where it is now done. A library without a catalogue is like a ship without a rudder. To equip the rudderless literary craft of the country would be a great and good work. I know of no other equally salutary that can be done at so little cost. It could be reduced to a minimum by printing the entries in sheets, on thin paper, and leaving the libraries to paste them on cards.

It is also an idea that is capable of much expansion to good advantage. The Department of Agriculture is now selling sets of catalogue cards for certain series of its publications. The same course might be followed by this office in cataloguing the public documents of past years for its document library. Instead of making at first a general catalogue it might take up some series, as the publications of the Treasury or the Fish Commission or the Abridgment of the Message and Documents, and first complete that, and when completed offer for sale to libraries and collectors printed sets of its catalogue cards for that particular series, to be followed by other series until the whole work was done. In this way the library work proposed to be done in this office could be made available for the whole country, and if catalogue cards were also sent out with each new current volume of documents in time the old catalogues and the new would meet, and the libraries of the country would be supplied not only with the public documents of the Government, but also with the key to them, without which their value is sadly limited and circumscribed.

HOW A LARGE SAVING MIGHT BE MADE WITHOUT INJURY TO ANY INTEREST.

The new printing law makes a large economy by directing that but little more than half of the reserve volumes shall hereafter be bound. The remaining part of the reserve number, which is intended to supply the needs of Members of Congress for volumes or sets in special binding, is to remain unbound until the orders of the Members for the special kinds of binding desired shall have been received by the Public Printer. Formerly these volumes were all bound in costly full sheep, and when the Congressional order called for something else the volume was unbound and bound over again—a most wasteful method. This has now been done away with, and the great cost of binding the reserve has been cut in two in the middle. But this is not all the advantage or saving that may be made in dealing with the reserve documents. I feel privileged to speak with some earnestness about this matter, from the fact that of the 582 copies of the reserve number of each of the Congressional documents that are directed to be bound in full sheep, 500 are for the use of the depository libraries and will pass through this office to reach them. It is my opinion that these libraries would be better served by binding the reserve in cloth at a small cost than in sheepskin at a large cost.

I have not directly canvassed the libraries on the subject of binding, but I have received many requests from them that they might have the cloth editions of certain documents instead of the sheep. The subject of bindings is one that is much discussed in the American Library Association, and though the views of the members are by no means unanimous, yet there is a strong majority opposed to sheep bindings, on grounds of appearance, durability, and cost. It is not possible to give absolute demonstration as to the durability of cloth bindings, because the first cloth-bound book is barely 70 years old, and the general use of cloth bindings comes much nearer than that to our own times. But the fact that cloth is much more used than any other binding material is a fact that ought to be convincing as to its utility. I have no doubt the prevailing opinion of librarians and publishers is expressed in a series of articles on binding, recently published in the organ of the American book trade, in which it was said:

Cloth or canvas will prove more lasting than most other materials, with the exception possibly of vellum or the better grades of levant morocco.

In the same series of articles, which is fortified by reference to 96 publications that were consulted in preparing it, this is said of sheep bindings:

Sheepskin is probably employed more extensively in binding than any other leather, but every book lover abhors it when he sees it in its undisguised form. Sheep, besides soiling easily, is not strong, lacks solidity and durability, and is reduced to a powder (sometimes occasioning explosions) by the action of heat and gas. [Publishers' Weekly, New York, March 23, 1895.]

It may be admitted that for law books, that must have much handling, sheepskin is preferable, and for some medical books the same excuse may be given; but for

statistical and scientific works, that remain mostly on the shelves and are consulted only occasionally, the weight of evidence is that cloth is more durable than sheep. On the score of propriety and fitness and appearance there is no argument whatever to be made in favor of sheep. The Government is the only great publisher that ever thinks of putting scientific, statistical, and historical works into sheep bindings. The Government practice in this respect unfavorably differentiates its publications from all others. By their leather bindings the public documents are made to seem dull, heavy, and forbidding. They seem to be all law books, and in consequence their vast variety of scientific information fails of the full measure of appreciation which is its due.

Cloth binding does not necessarily mean the coarse and ugly black cloth that was for many years used almost exclusively on the public documents. Such cloth is now less used than formerly, and many of the cloth bindings now turned out from the Government Printing Office are equal in beauty as well as durability to the best productions of the leading publishers. Such works are the new Yearbook of the Department of Agriculture, the latest issue of the Abridgment, the Catalogue of the Surgeon-General's Library, several of the volumes of the Eleventh Census, and many others. Neither does cloth binding mean that the books must be lettered with Dutch metal, which in a few years will turn black and disappear. The Government binders can use gold leaf and good cloth as well as other binders. I would not recommend cloth bindings on public documents for distribution to libraries if they were to be of the worst pattern that the Government Printing Office has ever turned out, but if they were to be of the best Government Printing Office standard I am confident that a great majority of the libraries would prefer them to the sheep-bound volumes with which they are now supplied. The minority, who might possibly not like the change, would not be in a position to complain, because they receive the books without cost, and librarians can not, any more than other people, look a gift horse in the mouth.

The great consideration in the premises, however, is the cost. As given to me by the Printing Office experts, the cost of binding per volume is from 10 to 30 cents for cloth, with a few exceptional instances where the cost runs up to 50 cents. For sheep, the lowest cost is 75 cents, and from that up to \$1.15 for octavos, while for all quartos the cost is \$1.50. The recent Congressional sets are bound in a variety of sizes, there being two kinds of octavos and two kinds of quartos. I have estimated that the increased cost of binding in sheep rather than in cloth can not average less than 75 cents a volume. The Congressional set, at least for the long sessions, now approaches very nearly 200 volumes, and probably will soon exceed that number. The number of copies of each of these documents directed to be bound in sheep is 582, or a total for the session of 116,400 volumes. To save 75 cents on each of these volumes would be a total saving of \$87,300. If such a sum can be saved annually without injury to any interest involved it would seem a desirable thing to do. This I fully believe to be the case in relation to the binding of the reserve, and if I had the power I would not have a moment's hesitation in directing that the reserve volumes of the Congressional documents be hereafter bound only in cloth.

Any doubter who wishes an object lesson in the decay of sheep bindings can be supplied with numerous examples at this office.

Much, also, might be said as to the greater promptness with which the reserve could be turned out in cloth. A binder can put up six or seven times as many cloth books in a day as he can of sheep-bound books. Thus, in respect to an early delivery, which is of the utmost importance to them, the libraries which are to be supplied from the reserve would be greatly benefited by a change from sheep to cloth.

There is a temptation to go on and inquire why there should be any reserve at all. When the first cloth edition is in the bindery, why should not the 15 copies for the Senate library, and the 15 copies for the House library, and the 50 copies for the foreign exchanges, and the 2 copies for the Library of Congress, and the 500 copies for the

depository libraries, making up the 582 copies which compose the sheep-bound reserve, be bound up at once in the cloth, instead of being delayed for future binding in the leather edition, which, after all, is only the same book in another shape? But perhaps this and numerous other queries which the study of the public documents suggests may most profitably be postponed for the present.

MISCELLANEOUS.

Formerly the Journals of the Senate and the House were supplied in numbers sufficient for all the depository libraries. Under the new law but 144 copies of the Journals for the third session of the Fifty-third Congress were supplied to me, and the law directed that of these 3 should go to libraries in each State. I sent one copy to each of the State and Territorial libraries, and usually the two others to the two largest libraries in the State. In a few instances, where special request was made by historical libraries, this designation was changed. Very few complaints at the loss of the Journals were received from the depository libraries.

The numbering and binding and shelving of the Congressional documents are much confused by the differences in size. As the numbers of the two sizes of documents are irregularly interspersed, consecutive binding is thus made impossible. It does not seem an impossibility to devise means by which all the documents might be printed in a uniform size. It would be a fine thing for the symmetry and regularity and coherence of the set of public documents if this could be accomplished.

It would seem to be almost a necessity that a Government catalogue should record the reports of the United States Supreme Court and the United States courts of appeals, but they are private publications, and no provision is made for supplying them to this office for cataloguing purposes. As the Government receives several hundred copies for the use of sundry officials, it is respectfully recommended that provision be made by law for supplying this office with a set thereof for its document library and with the current volumes for record in the monthly and annual catalogues.

PERSONAL.

I deem myself fortunate in having been able to secure the services as assistants and associates of such trained experts as Miss Adelaide R. Hasse, librarian, and Mr. John H. Hickcox, Miss Edith E. Clarke, and Mr. William S. Burns, cataloguers. They have all given to the Government more than a perfunctory service, and have shown a commendable zeal and professional pride in endeavoring to make the work of this new office equal to all demands upon it and to all expectations that had been formed concerning it. In fact, all the members of my staff have shown themselves industrious and intelligent workers, and my thanks are due to them all.

Mr. John G. Ames, of the Department of the Interior, has been most obliging and helpful to me, and I feel that a public expression of my thanks is fully his due. I have had to make heavy drafts also on the courtesy of other recognized document experts, and I am happy to be able to say that such drafts have always been honored in full. To the gentlemen who are the heads of departments in the Printing Office I am under especial obligations.

But my warmest thanks and acknowledgments are due to you for the constant aid and encouragement you have given my efforts to organize the service of conserving, cataloguing, and distributing the public documents on a basis of efficiency and economy.

F. A. CRANDALL,
Superintendent of Documents.

Hon. TH. E. BENEDICT,
Public Printer.

APPENDIX A.

Number of books received by the superintendent of documents to October 1, 1895.

From the accumulations in the Departments.....	134,361
From the Printing Office.....	21,264
Duplicates returned from libraries.....	2,570
 Total.....	 158,195
Distributed to libraries.....	21,463
Furnished to Departments and bureaus to fill files.....	42
To individuals.....	3
Sold.....	18
 Remaining on hand.....	 21,526
 Remaining on hand.....	 136,669

APPENDIX B.

The following are comments of the librarians of some of the depository libraries, chiefly in relation to the earlier receipt of the public documents:

AMHERST COLLEGE.—I take the liberty of writing to express my gratification with the results of your new method of distributing the documents. It is a great advantage to have the volumes sent so much more promptly. I am much pleased with the appearance of your new Monthly Catalogue and find nothing to offer in criticism.

ATLANTA (Ga.) YOUNG MEN'S LIBRARY.—The new method of mailing United States documents is highly satisfactory. Books are received in good condition and very much earlier than by the old method.

BOSTON ATHENAEUM.—I am glad to see that the congressional documents are to be delivered earlier than has been the practice under the former administration.

BROOKLYN (N. Y.) YOUNG MEN'S CHRISTIAN ASSOCIATION.—We have been much pleased with the early delivery of documents in single volumes. They reach us in better condition than they formerly did in bags.

BROWN UNIVERSITY, PROVIDENCE, R. I.—The new plan strikes me very favorably. Every volume has reached this library in perfect condition.

BUFFALO LIBRARY.—I hope you have received no two opinions on the plan of mailing single volumes from Washington instead of waiting for documents to accumulate by sackfuls. The new plan seems to me to be so vast a reform that there ought to be no question about it.

CASE LIBRARY, CLEVELAND, OHIO.—We much prefer the present method of sending out the documents as soon as ready. They reach us promptly and in good condition.

CINCINNATI PUBLIC LIBRARY.—The volumes come regularly to hand. I fully appreciate the work you are successfully accomplishing.

DARTMOUTH COLLEGE.—The books come to us in single volume packages in better condition than they did in the sacks. I consider the recent changes a great improvement.

DENVER (Colo.) PUBLIC LIBRARY.—I was at first inclined to protest at the method you have just adopted of shipping public documents. On second thought, however, I believe you are quite right.

DETROIT PUBLIC LIBRARY.—The prompt receipt of volumes is a very great advantage. The long delays in the past have done very much to disgust people who wished to get their information without waiting several years for it.

DOVER (N. H.) PUBLIC LIBRARY.—I am sure that librarians generally will find it, as I certainly do, of great advantage to receive the books promptly. I am very glad of the change.

FREDERICK (Md.) ACADEMY.—The books received by us since the new arrangement have come in better condition than those sent in sacks. We realize to a degree your efforts to help us and shall always be glad to adopt your recommendations and directions.

HARVARD UNIVERSITY.—I have had my secretary look into the matter of the receipt of public documents from you, and his report is very favorable to the present system. They come in good condition. Altogether, the present system is a great gain to us.

HOWARD MEMORIAL LIBRARY, NEW ORLEANS.—The distribution of public documents, volume by volume, is a decided improvement on the earlier method.

ILLINOIS STATE LIBRARY.—We are greatly pleased in receiving the public documents almost daily, and find it a great convenience.

ILLINOIS STATE NORMAL UNIVERSITY.—I am very glad of the improvement introduced into the management of the public documents. We value the Government publications highly.

KANSAS HISTORICAL SOCIETY, TOPEKA.—The books received from you through your new plan of mailing them in single wrappers are received in good condition. Libraries and the public have reason to be thankful to you for your interest and efficiency.

LONG ISLAND HISTORICAL SOCIETY, BROOKLYN, N. Y.—We receive the Government documents in good condition, and think the arrangement of getting the volumes soon after they are issued much more satisfactory than when they came in sacks long after date.

LOS ANGELES (Cal.) PUBLIC LIBRARY.—I take pleasure in acknowledging our appreciation of the new method of document distribution. The promptness with which we receive them is a self-evident advantage. The public show a growing appreciation of our documents, using them constantly. It will solve a great many difficulties, being able to put in their hands the latest report instead of one of several years previous. The documents have come to us in perfect order.

MARIETTA (Ohio) COLLEGE.—The books received in single wrappers are in very satisfactory condition. I promise my hearty cooperation in the matter of making all Government publications of the largest service to the public possible.

MINERS' UNION, VIRGINIA CITY, NEV.—Your new manner of sending by registered mail, singly, copies of all Government publications meets the hearty approval of our board of library directors, as well as my own, for more reasons than one, the principal reason being that we get each publication as fast as printed, and again, the work of cataloguing goes on in the regular routine of business, without involving the rush incidental to the old style of a "sack of books" at a time.

MINNESOTA HISTORICAL SOCIETY, ST. PAUL.—The present method of sending documents singly is far superior to the old.

MISSOURI UNIVERSITY, COLUMBIA, Mo.—I like your new plan. We want the books and like the service.

NEW YORK MERCANTILE LIBRARY.—I desire to express my appreciation of the change you have inaugurated in the mode and manner of distributing the documents of the National Government. The receipt of the books so frequently and at so much earlier date than formerly is of very great value. I am much pleased with the change you have made, and take pleasure in commending your action.

NORTH DAKOTA STATE LIBRARY.—The volumes reach us in much better condition than when they were sent in sacks. We seldom received a sack of books but one or more volumes had some broken corners, but have never received one in this condition that was sent in a single wrapper.

OGDEN COLLEGE, BOWLING GREEN, KY.—The books mailed to us in single wrappers have all arrived in excellent condition. We can not say the same of the books that have been sent us heretofore in sack lots, for not unfrequently some of them were more or less injured in transit.

ORCHARD LAKE (MICH.) MILITARY ACADEMY.—You are entitled to both thanks and congratulations for the great improvement you are working in the matter of mailing Government publications to the libraries throughout the country. Your system has my most hearty approval.

OTIS LIBRARY, NORWICH, CONN.—The single volumes of Congressional publications which you are sending in pursuance of a new plan have reached this library in uniformly good condition. The result at which you aim—promptness in distribution—is most important.

PENNSYLVANIA STATE LIBRARY.—I think your plan is a preferable one, as we are thereby enabled to receive the documents earlier, and this in itself is worth the additional trouble placed upon librarians.

PEORIA (ILL.) PUBLIC LIBRARY.—We like your plan of single-volume mailing better than in sacks, and the books are delivered in uniformly better condition.

PHILADELPHIA MERCANTILE LIBRARY.—I am sure the prompt sending of the books will be regarded as a great improvement on the old method.

PIERRE UNIVERSITY, EAST PIERRE, S. DAK.—All books coming under the new plan of transfer have come in good condition in single wrappers, and the intention to secure early delivery is appreciated. I am very glad that your work has been undertaken.

POLYTECHNIC INSTITUTE AND AGRICULTURAL AND MECHANICAL COLLEGE, AUBURN, ALA.—The present system is admirable; first, on account of receiving publications near date of issue; second, because of the excellent condition in which they arrive. The Government documents are much appreciated here, being reference books in many of the departments.

PORTLAND (ME.) PUBLIC LIBRARY.—Under the new system of delivery the Government publications have thus far, reached us in good condition.

PORTLAND (OREG.) LIBRARY ASSOCIATION.—The documents, as received singly, have come to us in perfect condition. I am delighted with the prospect of an improved document service, and wish you all success with your plans.

PRATT INSTITUTE, BROOKLYN, N. Y.—I can not tell you how much we appreciate the new system of distributing documents. It makes me feel as if there had been a revolution in Washington.

RUTGERS COLLEGE, NEW BRUNSWICK, N. J.—The receipt of the volumes singly has already been of benefit to this library, and the condition of the volumes is much better than formerly.

ST. JOSEPH (MO.) FREE PUBLIC LIBRARY.—The books, under the plan of mailing single volumes, are arriving in good order and condition. I think all librarians recognize the effort you are making to organize the document service and avoid delays, and I for one, both as librarian and in my official position as secretary of the American Library Association, will be glad to cooperate with you in every way possible.

ST. LOUIS PUBLIC LIBRARY.—The prompt receipt of single volumes is certainly more satisfactory than the old method of waiting till a sackful was on hand. The books, thus far, have reached us in perfect condition. Librarians, of all people, should be patient in this matter, for they ought to realize what a stupendous task you have undertaken.

SAN DIEGO (CAL.) PUBLIC LIBRARY.—We are glad to have public documents coming every day. The delay hitherto has subtracted from their usefulness.

SAN FRANCISCO FREE PUBLIC LIBRARY.—Regarding the present method of distributing public documents, as compared with the former system, it does not seem to me there could be any diversity of opinion. Our books are received promptly and in good condition. Furthermore, we have received, under the new régime, certain publications we never before had been able to get. I, for one, take great pleasure in expressing my appreciation of the new law and the manner in which it is being executed.

SOUTH DAKOTA STATE LIBRARY.—The books received from you for the library of this State have been in good condition, and I think that this mode of distributing the documents is better than the former one.

STOCKTON (KANS.) ACADEMY LIBRARY.—The present plan suits me much better than the old one. The sooner we can get the books after they are printed the better.

TEXAS STATE LIBRARY.—I take pleasure in complimenting you on the changes effected by you in the method of distributing Government publications. To have the volumes coming frequently in single wrappers is far preferable to the old way of sending them infrequently in large numbers.

UNIVERSITY OF MINNESOTA, MINNEAPOLIS.—The books mailed in single wrappers come to us in good order. It is a great advantage to receive them so, and I hope there will be no reason for going back to the old way.

UNIVERSITY OF WYOMING, LARAMIE, WYO.—I highly approve and commend the present method of sending out the Government documents one by one, for the reason that it makes it easier for the librarian in the work; the books come much sooner and are hence much more valuable, and it is the very best method of keeping in touch with the publications of the Departments at Washington.

UTICA (N. Y.) PUBLIC LIBRARY.—The way in which the public documents are being sent out at present is far more satisfactory to us than formerly.

WESLEYAN UNIVERSITY, BLOOMINGTON, ILL.—Concerning the delivery of single volumes, I wish to say that the books reach us in perfect condition, and that we are glad to receive them at the earlier date.

YALE UNIVERSITY.—The Government publications in separate wrappers have reached us uniformly in good condition, and with, of course, a great gain in promptness. Now that the printed description is added to the return cards, I do not see what more is to be desired.

The Lyceum Library at Houston is the oldest library in the State of Texas. It was founded while Texas was still an independent republic. The secretary of this venerable library association, Mr. H. W. Nelson, has sent in some original observations concerning the public documents, which have the approval of Mr. William H. Clute, the vice-president of the same venerable library foundation. They are submitted here in the hope that they may excite interest and possibly surprise, but it is hardly to be supposed that all the recommendations made will be adopted by Congress at once:

We take the liberty to respectfully suggest our ideas relative to the distribution, value, and care of public documents. There is no doubt in our minds that the distribution of public documents heretofore has been too promiscuous among persons who did not appreciate their true value. For instance, we find some valuable public documents in second hand book stores for sale, thus abusing the generosity of the Government. It has been said that some Members of Congress have in the past disposed of their quota of public documents otherwise than in the manner intended by the Government. Abuses have existed, without a doubt. In order to remedy this defect in distribution we would respectfully suggest that in the future no one but public depositories receive public documents. Others desiring the same should be permitted to purchase the desired publications from the United States Government at actual cost.

For the Government to approximately ascertain the number of any given report or document desired by the public, the superintendent of public documents might issue advance catalogues of the contemplated publications and mail the same to the post-offices throughout the Union with instructions to postmasters to post the same in conspicuous places. The public would then have ample opportunity to apply for any desired documents before the same were published. Under this plan the Government could estimate the exact number necessary to fill the demand.

As to the use or value of documents, we would say that we consider that all documents issued by the Government are of great and especial value, and more particularly those which treat of the agricultural interests and of the scientific departments of the Government and other institutions. But their usefulness might be greatly extended for the benefit of the American people if their scope of information was extended to embrace other topics than those now chiefly dwelt upon, e. g., business methods at home and abroad, the science of government as obtaining among foreign nations, and the ethics of religion and philosophy. Consular reports might include the practical workings and benefits of our missions abroad, concerning which they have heretofore been silent; also, should embrace the political history of American and European nations, together with the causes leading to the rise, growth, and decline of political parties. Also there should be at least one volume devoted to the literature of the country. Also a digest of important news, with expressions of most important newspapers of various political complexions and for different sections of the country.

As to the care of public documents, it would be well, in order that the people might understand and appreciate their value more fully, if the Government would employ some competent person, of literary ability and patriotic zeal, to travel and make an annual tour of inspection of the various public depositories, and see to it that proper care was taken of the documents, seeing that they were accessible to the public, assisting the librarian with suggestions relative to their usefulness, and calling the attention of the public by delivering addresses on their practical and specific value. Then the people would be better educated to receive and appreciate the generosity of the Government; and, in conclusion, we will say that, in our opinion, the distribution of public documents should be extended and their scope of subjects enlarged, and let it be the purpose of the Government to make the public documents as complete a cyclopedia of facts for the public as possible.

APPENDIX C.

In compliance with the law an earnest effort has been made to collect statistical information concerning the depository libraries. Up to the 1st of October 329 of them had furnished statistical reports more or less complete. Of these 43 are State libraries, 154 are libraries of colleges and schools, 58 are privately endowed or incorporated libraries, and 74 are public libraries maintained by taxation. The State libraries have 214,342 public documents, the school libraries have 378,774, the endowed libraries 164,461, and the public libraries 242,132, making altogether 999,709 public documents deposited in the 329 libraries thus far heard from. The 90 remaining depository libraries have undoubtedly enough to carry the total up to a million and a quarter. How many public documents may be preserved in the libraries which are not depositories I have no means of knowing, but as all American libraries have public documents to a greater or less number, and as the whole number of libraries in the country having above 1,000 volumes each was found by the Bureau of Education in 1891 to be 3,084, or eight times as many libraries that are not depositories as libraries that are depositories, the conclusion must be that the number of public documents in the libraries of the country is several millions.

The distribution of the documents by States and Territories in the 329 depository libraries that have been heard from is as follows:

State.	Number of depositories.	Number of documents.	State.	Number of depositories.	Number of documents.
Alabama	4	8,623	Nebraska	6	17,026
Arizona	1	2,000	Nevada.....	3	6,784
Arkansas	3	4,223	New Hampshire.....	5	24,963
California	8	26,612	New Jersey	7	25,820
Colorado	4	15,472	New York.....	26	83,966
Connecticut	7	16,498	North Carolina	6	25,000
Delaware	2	3,000	North Dakota	4	3,940
Florida	5	6,381	Ohio	17	50,130
Georgia	9	22,991	Oregon	3	14,500
Idaho	3	3,127	Pennsylvania	22	61,383
Illinois	14	38,132	Rhode Island	3	24,060
Indiana	13	29,484	South Carolina	7	43,750
Iowa	11	38,108	South Dakota	5	4,282
Kansas	5	16,675	Tennessee	5	18,535
Kentucky	6	16,118	Texas	3	9,809
Louisiana	6	13,297	Utah	2	2,950
Maine	6	25,274	Vermont	4	20,900
Maryland	7	24,000	Virginia	4	20,181
Massachusetts	15	61,676	Washington	6	6,615
Michigan	13	40,313	West Virginia	5	7,700
Minnesota	10	20,629	Wisconsin	10	35,766
Mississippi	4	7,781	Wyoming	3	3,773
Missouri	12	38,381	Total	329	999,709
Montana	5	9,051			

APPENDIX D.

The list of designated depositories has been somewhat changed since it was transferred from the Interior Department early in July last. Several libraries have been dropped for various reasons (usually their own request) and several have been added on the designation of Members of Congress. The list stood as follows October 1:

	Depository.	Location.
Department of State Library.....		Washington, D. C.
Treasury Department Library.....		Do.
War Department Library		Do.
Department of Justice Library		Do.
Post-Office Department Library		Do.
Navy Department Library		Do.
Department of the Interior Library		Do.
Department of Agriculture Library		Do.
Library United States Military Academy		West Point, N. Y.
Library United States Naval Academy		Annapolis, Md.

Dis- trict.	Depository.	Location.
ALABAMA.		
1	Alabama State Library	Montgomery.
2	Senatorial:	
3	Howard College Library	East Lake.
4	Spring Hill College Library	Mobile.
5	State Board of Health Library	Montgomery.
6	Agricultural and Mechanical College	Auburn.
7	Wetumpka Academy Public Library	Wetumpka.
8	University of Alabama Library	University.
9	Birmingham Public Library	Birmingham.
ARIZONA.		
P	The Territorial Library	Phoenix.
	The Free Public Library	Tucson.

APPENDIX D—Continued.

District.	Depository.	Location.
ARKANSAS.		
	Arkansas State Library.....	Little Rock.
	Senatorial:	
	Arkansas Cumberland College Library.....	Clarksville.
	Marquand Public Library.....	Little Rock.
1	The Woman's Library Association.....	Helena.
2	Public School Library Association.....	Fort Smith.
2	Branch Normal College.....	Pine Bluff.
3		
4		
5	Arkansas Industrial University.....	Fayetteville.
6		
CALIFORNIA.		
	California State Library.....	Sacramento.
	Senatorial:	
	Free Public Library.....	Do.
	Free Public Library.....	San Francisco.
1	Free Public Library.....	Stockton.
2	University of California Library.....	Berkeley.
3	Mechanics' Institute Library.....	San Francisco.
5	Leland Stanford Junior University Library.....	Stanford University.
6	The Public Library.....	Los Angeles.
7	Public Library.....	San Diego.
COLORADO.		
	Colorado State Library.....	Denver.
	Senatorial:	
	University of Colorado Library.....	Boulder.
	Colorado College Library.....	Colorado Springs.
1	Public Library.....	Denver.
2	McClelland Public Library.....	Pueblo.
CONNECTICUT.		
	Connecticut State Library.....	Hartford.
	Senatorial:	
	The Otis Library.....	Norwich.
	Sils Bronson Library.....	Waterbury.
1	Trinity College Library.....	Hartford.
2	Yale College Library.....	New Haven.
3	Public Library of New London.....	New London.
4	Public Library and Reading Room.....	Bridgeport.
DELAWARE.		
	Delaware State Library.....	Dover.
	Senatorial:	
	The Institute Library.....	Wilmington.
At large :	New Castle Library Company.....	New Castle.
FLORIDA.		
	Florida State Library.....	Tallahassee.
	Senatorial:	
	John B. Stetson University Library.....	De Land.
	Public Library of Santa Rosa Academy.....	Milton.
1	Library of Seminary West of Suwanee River.....	Tallahassee.
2	Conference College Library.....	Leesburg.
GEORGIA.		
	Georgia State Library.....	Atlanta.
	Senatorial:	
	Northern Georgia Agricultural College Library.....	Dahlonega.
	Emory College Library.....	Oxford.
1	Georgia Historical Society Library.....	Savannah.
2		
3		
4	The Library Association.....	Newnan.
5	Young Men's Library Association.....	Atlanta.
6	The Public Library.....	Macon.
7	Young Men's Library Association.....	Rome.
8	University of Georgia Library.....	Athens.
9	The College Library.....	Gainesville.
10	Young Men's Library Association.....	Augusta.
11		

APPENDIX D—Continued.

Dis-trict.	Depository.	Location.
IDAHO.		
	Idaho State Library.....	Boise City.
	Senatorial:	
	Blackfoot District School Library.....	Blackfoot.
	Public School Library.....	Lewiston.
	At large:	
	Idaho State University Library.....	Moscow.
ILLINOIS.		
	Illinois State Library.....	Springfield.
	Senatorial:	
	Northwestern University Library.....	Evanston.
1	Illinois State Normal University Library.....	Normal.
2	Cook County Normal School Library.....	Englewood.
3	Public Library.....	Chicago.
4	Newberry Library.....	Do.
5	Chicago Historical Society Library.....	Do.
6	Gail Borden Public Library.....	Elgin.
7	Seminary Library.....	Mount Carroll.
8	Matson Public Library.....	Princeton.
9	Public Library.....	Joliet.
10	Public Library.....	Peoria.
11	Monmouth College Library.....	Monmouth.
12	Library Association.....	Carrollton.
13	Illinois State Historical Library.....	Springfield.
14	Illinois Wesleyan University Library.....	Bloomington.
15	Library University of Illinois.....	Champaign.
16	Public Library.....	Oiley.
17	Belleville Public Library.....	Belleville.
18	Supreme Court Library.....	Mount Vernon.
19	Southern Illinois Normal University Library.....	Carbondale.
20		
21		
22		
INDIANA.		
	Indiana State Library.....	Indianapolis.
	Senatorial:	
	Indiana University Library.....	Bloomington.
	Library of De Pauw University.....	Greencastle.
1	Willard Library.....	Evansville.
2	Library of Vincennes University.....	Vincennes.
3	Borden Institute Library.....	Borden.
4	Hanover College Library.....	Hanover.
5	Franklin College Library.....	Franklin.
6	Public Library.....	Muncie.
7	Butler University Library.....	Irvington.
8	Wabash College Library.....	Crawfordsville.
9	Public Library.....	La Fayette.
10	Northern Indiana Normal School Library.....	Valparaiso.
11	Free Library of the Public Schools.....	Huntington.
12		
13	Lemonnier Library of Notre Dame du Lac.....	Notre Dame.
IOWA.		
	Iowa State Library.....	Des Moines.
	Senatorial:	
	Young Men's Library Association.....	Dubuque.
	Wesleyan University Library.....	Mount Pleasant.
1	Jefferson County Library Association.....	Fairfield.
2	Library Association.....	Davenport.
3	Public Library.....	Cedar Falls.
4	Upper Iowa University Library.....	Fayette.
5	State University of Iowa Library.....	Iowa City.
6	Iowa College Library.....	Ginnell.
7	Public Library.....	Des Moines.
8		
9	Free Public Library.....	Council Bluffs.
10	Public Library Association.....	Boone.
11	Sioux City Public Library.....	Sioux City.
KANSAS.		
	Kansas State Library.....	Topeka.
	Senatorial:	
	Kansas State University Library.....	Lawrence.
	Kansas State Historical Society Library.....	Topeka.

APPENDIX D—Continued.

Dis-trict.	Depository.	Location.
KANSAS—continued.		
At large:	Paola Free Library.....	Paola.
1	City Library.....	Lawrence.
2	Oswego Library Association.....	Oswego.
3	Kansas State Agricultural College Library.....	Manhattan.

Lining sliding doors.....	8.50
Gongs	17.75
Hauling dirt.....	295.42
Miscellaneous	65.61
Machinery, tools, and implements:	
Printing presses:	
4 No. 2 Huber.....	\$15,000.00
1 Whitlock, bed 27 by 30 inches.....	1,850.00
1 Whitlock, bed 29 by 42 inches.....	4,700.00
1 No. 4 Hoe stop-cylinder	2,600.00
1 No. 5 Hoe job	1,275.00
1 quarter medium.....	650.00
1 Washington hand, No. 1.....	120.00
1 Washington hand, No. 3.....	185.00
1 self-inking proof	250.00
	26,630.00
1 automatic book-covering machine.....	3,500.00
Repairs to engine and other machinery.....	3,528.03
1 machine for backing electrotype plates, with 2 motor blowers and 2 extra pans.....	1,135.00
1 hydraulic molding press.....	900.00
1 dynamo for electrotyping	850.00
1 dynamo for nickel plating.....	650.00
2 book-trimming machines.....	673.88
2 machines for curving electrotype plates.....	600.00
Moving and adjusting 2 web presses.....	572.50
1 thread stitching machine	480.00
1 electrotype beveling machine.....	475.00
4 No. 6 standing presses.....	468.00
1 combined pump and governor.....	460.00
1 17-inch backing machine.....	450.00

1 paper-cutting machine.....	\$420.32
Bookbinders' finishing tools.....	798.10
Fixtures to ruling machines.....	362.94
Erecting pump and removing shafting, etc.....	351.00
2 electric motors.....	385.42
4 vats for electrotyping.....	307.00
1 vat, with bars, for nickel salts.....	60.00
3 32-inch bookbinders' table shears.....	300.00
1 paging and numbering machine.....	260.00
1 notching and trimming machine.....	250.00
1 tenoning machine.....	250.00
2 io-hole glue heaters, with kettles.....	225.00
1 steam table, with 40-gallon kettle.....	220.00
Fixtures to presses.....	255.83
500 pieces labor-saving furniture.....	120.00
1 250-volt armature for dynamo.....	112.50
Repairs to boiler.....	106.16
Lengthening 24-inch belt.....	79.11
Shortening 36-inch belt.....	30.00
2 letter-copying presses.....	74.65
Fixtures for book-trimming machines.....	127.65
1 book-sewing machine.....	63.00
Dressing 15 imposing stones.....	62.00
1 injection valve.....	53.01
Gripper and slide for lead machine.....	50.00
1 slug mold.....	50.00
1 steam trap.....	49.60
30 galvanized-iron receptacles.....	45.00
1 grindstone frame.....	45.00
2 figure gauges.....	43.90
18 springs for backing machines.....	42.00
8 double hangers.....	40.00
15 dozen dividers.....	38.35
Resetting coping for press.....	35.00
1 saw-filing machine.....	35.00
157 planers.....	35.30
1 chain hoist.....	30.00
2 volt meters.....	30.00
9 $\frac{3}{4}$ feet shafting.....	28.80
1 cedar tank.....	28.00
2 clothes wringers.....	28.00
10 gas stoves.....	41.40
Setting up molding press.....	25.00
1 2 $\frac{1}{2}$ -inch governor for engine.....	24.75
24 lithographic stones, 8 by 10 inches.....	24.00
16 roulettes.....	24.00
Rail standards.....	23.34
23 shovels.....	23.18
4 galvanized-iron boxes.....	20.00
1 paint mill.....	20.00
Clamps.....	24.30
8 dozen mallets, at \$2.38.....	19.04
3,456 punches for perforating machine.....	34.56
6 finishing presses.....	16.20
1 table for preparing nickel salts.....	15.50
2 type cabinets.....	29.03
31 pounds picker leather packings.....	13.95
1 rule and lead cutter.....	13.50
1 nonadjustable mule-pulley stand.....	12.95
8 oil pans, at \$1.50.....	12.00
2 counter scales.....	11.00
2 iron tanks.....	10.00
Repairing paper-testing machine.....	10.00

Julius Bien & Co., New York, N. Y.....	2,653.00
The Norris Peters Company, Washington, D. C.....	2,756.00

Item 2, photolithographing and printing 7,794 copies each of 179 pages of Russian manuscript:

A. Hoen & Co., Baltimore, Md.....	425.00
The Norris Peters Company, Washington, D. C.....	440.00
Julius Bien & Co., New York, N. Y.....	637.00
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	684.00
The Heliotype Printing Company, Boston, Mass.....	889.00

Item 3, engraving 6 illustrations by half-tone process:

F. W. S. Blanchard, Bath, Me.....	25.00
Photo-Engraving Company, New York, N. Y.....	30.00
National Photo-Engraving Company, New York, N. Y.....	34.00
Moss Engraving Company, New York, N. Y.....	75.00

SCHEDULE OF PROPOSALS FOR CHROMOLITHOGRAPHING AND PRINTING 31,794 COPIES EACH OF 25 ILLUSTRATIONS FOR FINAL REPORT OF THE ELEVENTH CENSUS ON AGRICULTURE.

Sackett & Wilhelms Lithographing Company, New York, N. Y.....	\$3,700.00
A. Hoen & Co., Baltimore, Md.....	5,700.00
Geo. S. Harris & Sons, Philadelphia, Pa.....	5,930.00
Julius Bien & Co., New York, N. Y.....	6,639.00

SCHEDULE OF PROPOSALS FOR CHROMOLITHOGRAPHING AND PRINTING 5,294 COPIES OF 1 ILLUSTRATION FOR FIFTEENTH ANNUAL REPORT OF THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY, PART 1.

Sackett & Wilhelms Lithographing Company, New York, N. Y.....	\$205.00
A. Hoen & Co., Baltimore, Md.....	220.00
Julius Bien & Co., New York, N. Y.....	230.00
Geo. S. Harris & Sons, Philadelphia, Pa.....	300.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 334 ILLUSTRATIONS FOR PROCEEDINGS OF THE PAN-AMERICAN MEDICAL CONGRESS.

Item 1, chromolithographing and printing 11,794 copies each of 30 illustrations:

Steeher Lithographic Company, Rochester, N. Y.....	\$950.00
Forbes Lithograph Manufacturing Company, Boston, Mass.....	1,382.00
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	1,390.00
A. Hoen & Co., Baltimore, Md.....	1,840.00
Geo. S. Harris & Sons, Philadelphia, Pa.....	1,850.00
Brett Lithographing Company, New York, N. Y.....	2,430.00
Julius Bien & Co., New York, N. Y.....	2,469.00

Item 2, printing (by photo-gelatin process) 11,794 copies of 1 illustration:

New York Photogravure Company, New York, N. Y.....	98.00
The Heliotype Printing Company, Boston, Mass.....	127.00
The F. Gutekunst Company, Philadelphia, Pa.....	150.00
Forbes Lithograph Manufacturing Company, Boston, Mass.....	176.88
The Albertype Company, New York, N. Y.....	199.00

Item 3, engraving on wood 81 illustrations:

F. W. S. Blanchard, Bath, Me.....	295.00
Binner Engraving Company, Chicago, Ill.....	389.50
E. Heinemann, Fort Wadsworth, N. Y.....	496.00
Bookhout Brothers, New York, N. Y.....	637.00
Max G. Widnauer, New York, N. Y.....	782.25
Petri & Pels, New York, N. Y.....	793.50
Otto Heidemann, Washington, D. C.....	990.20

Item 4, engraving 222 relief-plate illustrations:

F. W. S. Blanchard, Bath, Me.....	310.00
The Maurice Joyce Engraving Company, Washington, D. C.....	347.19
Binner Engraving Company, Chicago, Ill.....	367.58
Photo-Engraving Company, New York, N. Y.....	387.00
New York Engraving and Printing Company, New York, N. Y.....	475.00
National Photo-Engraving Company, New York, N. Y.....	1,020.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 133 ILLUSTRATIONS FOR MEMOIRS OF THE NATIONAL ACADEMY OF SCIENCES FOR 1894.

Item 1, lithographing and printing 4,294 copies each of 41 illustrations:

The J. Ottmann Lithographing Company, New York, N. Y.....	\$3,172.50
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	3,240.00
A. Hoen & Co., Baltimore, Md.....	4,523.00
Julius Bien & Co., New York, N. Y.....	4,783.00
The Heliotype Printing Company, Boston, Mass.....	4,863.00
Brett Lithographing Company, New York, N. Y.....	5,789.50
The Giles Company, New York, N. Y.....	7,750.00

Item 2, photolithographing and printing 4,294 copies each of 10 illustrations:

The Heliotype Printing Company, Boston, Mass.....	120.50
The Friedenwald Company, Baltimore, Md.....	130.00
The Norris Peters Company, Washington, D. C.....	135.00
A. B. Graham, Washington, D. C.....	139.00
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	160.00
A. Hoen & Co., Baltimore, Md.....	196.00
Julius Bien & Co., New York, N. Y.....	198.00

Item 3, printing (by photo-gelatin process) 4,294 copies each of 6 illustrations:

The Heliotype Printing Company, Boston, Mass.....	329.00
The F. Gutekunst Company, Philadelphia, Pa.....	408.90
The Albertype Company, New York, N. Y.....	500.00

Item 4, engraving on wood 3 illustrations:

F. W. S. Blanchard, Bath, Me.....	34.00
E. Heinemann, Fort Wadsworth, N. Y.....	53.00
E. Bookhout, Jr., New York, N. Y.....	70.00
Otto Heidemann, Washington, D. C.....	95.00
Merrill Meushaw, Baltimore, Md.....	175.00

Item 5, engraving 73 relief-plate illustrations:

Photo-Engraving Company, New York, N. Y.....	53.00
The F. Gutekunst Company, Philadelphia, Pa.....	89.55
Moss Engraving Company, New York, N. Y.....	90.00
F. W. S. Blanchard, Bath, Me.....	96.00
The Maurice Joyce Engraving Company, Washington, D. C.....	112.35
Electro Light Engraving Company, New York, N. Y.....	112.50
Lawrence Engraving Company, New York, N. Y.....	138.50
New York Engraving and Printing Company, New York, N. Y.....	220.00

SCHEDULE OF PROPOSALS FOR CHROMOLITHOGRAPHING AND PRINTING 10,000 COPIES OF 1 ILLUSTRATION
FOR FIFTEENTH ANNUAL REPORT OF THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY,
PART 1.

The Friedenwald Company, Baltimore, Md.....	\$219.00
A. Hoen & Co., Baltimore, Md.....	225.00
Julius Bien & Co., New York, N. Y.....	242.00
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	275.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 87 ILLUSTRATIONS FOR FIFTEENTH ANNUAL REPORT OF THE
DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY.

Item 1, chromolithographing and printing 15,294 copies each of 9 illustrations:

The J. Ottmann Lithographing Company, New York, N. Y.....	\$2,144.00
A. Hoen & Co., Baltimore, Md.....	2,272.00
Julius Bien & Co., New York, N. Y.....	2,398.00
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	2,490.00
The Heliotype Printing Company, Boston, Mass.....	2,583.00
Brett Lithographing Company, New York, N. Y.....	3,093.00

Item 2, photo-engraving 47 illustrations:

The Maurice Joyce Engraving Company, Washington, D. C.....	35.76
Binner Engraving Company, Chicago, Ill.....	45.00
Electro-Light Engraving Company, New York, N. Y.....	47.50
Photo-Engraving Company, New York, N. Y.....	51.75
New York Engraving and Printing Company, New York, N. Y.....	57.00
The Heliotype Printing Company, Boston, Mass.....	60.08
The F. Gutekunst Company, Philadelphia, Pa.....	60.45
H. C. Jones, New York, N. Y.....	65.00
F. W. S. Blanchard, Bath, Me.....	70.00
Lawrence Engraving Company, New York, N. Y.....	73.00

Item 3, engraving 31 illustrations by half-tone process:

F. W. S. Blanchard, Bath, Me.....	\$120.00
Photo-Engraving Company, New York, N. Y.....	127.00
Electro-Light Engraving Company, New York, N. Y.....	137.50
Binner Engraving Company, Chicago, Ill.....	140.00
New York Engraving and Printing Company, New York, N. Y.....	143.00
The Maurice Joyce Engraving Company, Washington, D. C.....	149.10
The F. Gutekunst Company, Philadelphia, Pa.....	164.50
Moss Engraving Company, New York, N. Y.....	175.00
H. C. Jones, New York, N. Y.....	215.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 73 ILLUSTRATIONS FOR MONOGRAPH XXV, UNITED STATES GEOLOGICAL SURVEY.

Item 1, chromo-lithographing and printing 4,794 copies each of 32 illustrations:

A. Hoen & Co., Baltimore, Md.....	\$1,765.00
The Friedenwald Company, Baltimore, Md.....	1,930.00
Sackett & Wilhelms Lithographing Company, New York, N. Y.....	1,985.00
Julius Bien & Co., New York, N. Y.....	2,198.00
The Heliotype Printing Company, Boston, Mass.....	2,247.00
Brett Lithographing Company, New York, N. Y.....	2,699.00

Item 2, engraving 41 relief-plate illustrations:

The Maurice Joyce Engraving Company, Washington, D. C.....	39.91
Electro-Light Engraving Company, New York, N. Y.....	41.50
F. W. S. Blanchard, Bath, Me.....	46.00
New York Engraving and Printing Company, New York, N. Y.....	49.00
H. C. Jones, New York, N. Y.....	50.00
Moss Engraving Company, New York, N. Y.....	55.00
The F. Gutekunst Company, Philadelphia, Pa.....	55.46
Lawrence Engraving Company, New York, N. Y.....	73.00
Photo-Engraving Company, New York, N. Y.....	74.00

SCHEDULE OF PROPOSALS FOR ENGRAVING 179 RELIEF-PLATE ILLUSTRATIONS FOR REPORT OF COMMISSIONER OF LABOR ON HOUSING FOR WORKING PEOPLE.

Moss Engraving Company, New York, N. Y.....	\$320.00
H. C. Jones, New York, N. Y.....	375.00
The Maurice Joyce Engraving Company, Washington, D. C.....	382.89
Electro-Light Engraving Company, New York, N. Y.....	399.00
F. W. S. Blanchard, Bath, Me.....	467.00
Photo-Engraving Company, New York, N. Y.....	524.00
Lawrence Engraving Company, New York, N. Y.....	578.00
New York Engraving and Printing Company, New York, N. Y.....	1,075.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 96 ILLUSTRATIONS FOR BULLETIN OF THE UNITED STATES FISH COMMISSION FOR 1895.

Item 1, chromolithographing and printing 6,794 copies each of 10 illustrations:

Sackett & Wilhelms Lithographing Company, New York, N. Y.....	\$925.00
The J. Ottmann Lithographing Company, New York, N. Y.....	1,156.60
The Giles Company, New York, N. Y.....	1,344.00
The Heliotype Printing Company, Boston, Mass.....	1,450.50
Julius Bien & Co., New York, N. Y.....	1,584.00
Brett Lithographing Company, New York, N. Y.....	1,995.90

Item 2, photo-engraving 58 illustrations:

The Maurice Joyce Engraving Company, Washington, D. C.....	64.56
F. W. S. Blanchard, Bath, Me.....	79.00
The Heliotype Printing Company, Boston, Mass.....	81.10
Electro-Light Engraving Company, New York, N. Y.....	81.50
Photo-Engraving Company, New York, N. Y.....	83.00
Moss Engraving Company, New York, N. Y.....	100.00
H. C. Jones, New York, N. Y.....	100.00
The F. Gutekunst Company, Philadelphia, Pa.....	109.47
New York Engraving and Printing Company, New York, N. Y.....	110.00
Binner Engraving Company, Chicago, Ill.....	115.00
Lawrence Engraving Company, New York, N. Y.....	135.00

Item 3. engraving 28 illustrations by half-tone process:

The Maurice Joyce Engraving Company, Washington, D. C.....	\$105.12
New York Engraving and Printing Company, New York, N. Y.....	151.00
F. W. S. Blanchard, Bath, Me.....	179.00
Electro-Light Engraving Company, New York, N. Y.....	179.50
The F. Gutekunst Company, Philadelphia, Pa.....	215.32
Photo-Engraving Company, New York, N. Y.....	227.00
Binner Engraving Company, Chicago, Ill.....	240.00
Moss Engraving Company, New York, N. Y.....	275.00
H. C. Jones, New York, N. Y.....	275.00

SCHEDULE OF PROPOSALS FOR LITHOGRAPHING AND PRINTING 75,000 COPIES EACH OF 44 ILLUSTRATIONS
FOR REPORT ON DISEASES OF THE HORSE.

Avil Printing Company, Philadelphia, Pa.....	\$2,157.00
Sackett & Wilhelm's Lithographing Company, New York, N. Y.....	2,750.00
Julius Bien & Co., New York, N. Y.....	3,160.00
Brett Lithographing Company, New York, N. Y.....	3,300.00
A. Hoen & Co., Baltimore, Md.....	4,250.00

SCHEDULE OF PROPOSALS FOR CHROMOLITHOGRAPHING AND PRINTING 14,750 COPIES EACH OF 6 ILLUSTRATIONS
FOR SIXTEENTH ANNUAL REPORT OF THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY, PART 2.

A. Hoen & Co., Baltimore, Md.....	\$365.00
Julius Bien & Co., New York, N. Y.....	524.00

SCHEDULE OF PROPOSALS FOR PHOTO ENGRAVING 4 ILLUSTRATIONS FOR SIXTEENTH ANNUAL REPORT
OF THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY, PART 2.

New York Engraving and Printing Company, New York, N. Y.....	\$12.00
Moss Engraving Company, New York, N. Y.....	14.00
The Maurice Joyce Engraving Company, Washington, D. C.....	15.00
National Photo Engraving Company, New York, N. Y.....	15.00
Photo-Engraving Company, New York, N. Y.....	19.75

SCHEDULE OF PROPOSALS FOR REPRODUCING 4 ILLUSTRATIONS FOR SIXTEENTH ANNUAL REPORT OF
THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY, PART 2.

Item 1, lithographing and printing 14,750 copies each of 3 illustrations: A. Hoen & Co., Baltimore, Md.....	\$115.00
Item 2. photo-engraving 1 illustration: The Maurice Joyce Engraving Company, Washington, D. C.....	1.50
Moss Engraving Company, New York, N. Y.....	2.00
Photo-Engraving Company, New York, N. Y.....	2.40

SCHEDULE OF PROPOSALS FOR REPRODUCING 42 ILLUSTRATIONS FOR MEMOIRS OF THE NATIONAL ACADEMY OF SCIENCES FOR 1894.

Item 1, chromolithographing and printing 4,294 copies each of 6 illustrations: Julius Bien & Co., New York, N. Y.....	\$1,092.00
A. Hoen & Co., Baltimore, Md.....	1,200.00
Item 2. engraving 36 relief plate illustrations: The Maurice Joyce Engraving Company, Washington, D. C.....	30.00
Philadelphia Photo-Electrotype Company, Philadelphia, Pa.....	36.00

SCHEDULE OF PROPOSALS FOR PHOTO-ENGRAVING 7 ILLUSTRATIONS FOR SIXTEENTH ANNUAL REPORT
OF THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY, PART 1.

New York Engraving and Printing Company, New York, N. Y.....	\$17.50
The Maurice Joyce Engraving Company, Washington, D. C.....	18.00
Moss Engraving Company, New York, N. Y.....	19.00
Photo-Engraving Company, New York, N. Y.....	22.50
Philadelphia Photo-Electrotype Company, Philadelphia, Pa.....	27.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 98 ILLUSTRATIONS FOR FINAL REPORT OF THE ELEVENTH CENSUS ON VITAL AND SOCIAL STATISTICS, PART 2.

Item 1, chromolithographing and printing 11,794 copies each of 34 illustrations: A. Hoen & Co., Baltimore, Md.....	\$2,000.00
Julius Bien & Co., New York, N. Y.....	3,124.00

Item 2, engraving 64 relief-plate illustrations:

The Maurice Joyce Engraving Company, Washington, D. C.....	\$150.00
The F. Gutekunst Company, Philadelphia, Pa.....	160.58
Photo-Engraving Company, New York, N. Y	161.00
New York Engraving and Printing Company, New York, N. Y.....	177.00
National Photo-Engraving Company, New York, N. Y.....	(*)

SCHEDULE OF PROPOSALS FOR PHOTO-ENGRAVING 4 ILLUSTRATIONS FOR SIXTEENTH ANNUAL REPORT
OF THE DIRECTOR OF THE UNITED STATES GEOLOGICAL SURVEY, PART 2.

Philadelphia Photo Electrotype Company, Philadelphia, Pa.....	\$1.25
The Maurice Joyce Engraving Company, Washington, D. C.....	7.00
Photo-Engraving Company, New York, N. Y.....	12.00

SCHEDULE OF PROPOSALS FOR REPRODUCING 139 ILLUSTRATIONS FOR FOURTEENTH ANNUAL REPORT
OF THE DIRECTOR OF THE BUREAU OF ETHNOLOGY.

Item 1, chromolithographing and printing 9,800 copies each of 3 illustrations:

Julius Bien & Co., New York, N. Y.....	\$388.00
A. Hoen & Co., Baltimore, Md.....	540.00

Item 2, printing (by photo-gelatin process) 9,800 copies each of 11 illustrations:

New York Photogravure Company, New York, N. Y	825.00
The F. Gutekunst Company, Philadelphia, Pa	1,957.00
The Albertype Company, New York, N. Y.....	1,960.00

Item 3, photo-engraving 27 illustrations:

Philadelphia Photo-Electrotype Company, Philadelphia, Pa.....	23.20
National Photo-Engraving Company, New York, N. Y	25.50
Moss Engraving Company, New York, N. Y.....	30.00
The F. Gutekunst Company, Philadelphia, Pa	32.56
The Maurice Joyce Engraving Company, Washington, D. C.....	33.90
Photo-Engraving Company, New York, N. Y.....	36.50
The Albany Engraving Company, Albany, N. Y.....	49.60

Item 4, engraving 98 illustrations by half-tone process:

Photo-Engraving Company, New York, N. Y.....	395.00
Philadelphia Photo-Electrotype Company, Philadelphia, Pa	418.35
The F. Gutekunst Company, Philadelphia, Pa	437.64
The Maurice Joyce Engraving Company, Washington D. C	453.63
National Photo-Engraving Company, New York, N. Y.....	460.00
Moss Engraving Company, New York, N. Y	500.00
The Albany Engraving Company, Albany, N. Y	731.48

SCHEDULE OF PROPOSALS FOR REPRODUCING 388 ILLUSTRATIONS FOR FIFTEENTH ANNUAL REPORT OF
THE DIRECTOR OF THE BUREAU OF ETHNOLOGY.

Item 1, chromolithographing and printing 9,800 copies each of 6 illustrations:

A. Hoen & Co., Baltimore, Md.....	\$960.00
Julius Bien & Co., New York, N. Y	1,595.00

Item 2, photo-engraving 317 illustrations:

Photo-Engraving Company, New York, N. Y	180.00
The Maurice Joyce Engraving Company, Washington. D. C.....	187.52
National Engraving Company, New York, N. Y	188.00
Moss Engraving Company, New York, N. Y	205.00
The Albany Engraving Company, Albany, N. Y	268.97
Philadelphia Photo-Electrotype Company, Philadelphia, Pa.....	514.80

Item 3, engraving 65 illustrations by half-tone process:

The F. Gutekunst Company, Philadelphia, Pa	187.32
Moss Engraving Company, New York, N. Y	190.00
The Maurice Joyce Engraving Company, Washington, D. C.....	196.54
Photo-Engraving Company, New York, N. Y	199.00
National Photo-Engraving Company, New York, N. Y	215.00
Philadelphia Photo-Electrotype Company, Philadelphia, Pa	284.20
The Albany Engraving Company, Albany, N. Y	324.05

Six cents per square inch.

No. 29.—Statement showing the number of persons employed in the public printing and binding (including Congressional Record) during the fiscal year ended June 30, 1895, with the length of time each has been employed and the amount each has received.
